

Shelf Support Use and Care Manual

Dolle Shelf Supports are designed to be used with various shelf boards. Each shelf support will list the shelves they are compatible with in the installation guide.

Use and Care

Shelf supports are designed to be used indoors. It should not be placed in direct contact with water or moisture. When cleaning, use a clean dry cloth to spot clean.

The supports are not designed to be cut or modified in any way. If the structure of the support is changed, it will compromise the structural integrity of the shelf.

Weight Limit

The weight limit for each shelf support is dependent on the mounting method. When installed into studs, the weight limit is higher. When installed into drywall with screw anchors, the weight limit decreases by 50%. Please refer to the shelf support installation guide for more details on weight limits.
