

All About Bounce Dryer Sheets

Toss Bounce In.
Toss Static, Wrinkles,
and Odor out.

Why Dryer Sheets?

Bounce® dryer sheets are the best way to dry clothes and keep them smelling fresh and feeling soft. Infused with fabric softener, Bounce® dryer sheets transfer lubricating fabric care agents to the surface of your clothes during your dryer cycle. Bounce® also fights static and wrinkles because it works right where they happen - inside your dryer.

Bounce® Benefits:

1. Reduces Wrinkles

2. Fights Static

3. Softens & Freshens

4. Fights Odor*

*Bounce® Sport™ only.

There's no better way to dry your laundry than with Bounce® dryer sheets... unless of course staticky, wrinkly, smelly clothes are your thing.

How to Use Bounce®?

Step 1:

Toss laundry in the dryer.

Step 2:

Toss two (2) Bounce® sheets in the dryer for average loads.

Step 3:

Toss wrinkles, static and odor* goodbye with Bounce®.

How Many Dryer Sheets Do You Need?

How many dryer sheets you'll need depends on the size of the load. Toss in two Bounce® dryer sheets for your average loads to iron less, fight more static, repel more lint & pet hair, and add more softness & freshness. For small & medium loads toss in one Bounce® dryer sheet, and for extra-large loads toss in three!

Dryer Sheets VS Liquid Fabric Softener

Unlike traditional fabric softener, Bounce® works in the dryer where static happens. During the tumbling of the dryer, the Bounce® sheet's softening ingredients are transferred to the surface of fabrics via heat and physical contact which helps prevent the things on your fabrics that lead to a static charge.

Bounce® Dryer Sheets	VS	Liquid Fabric Softener
✓		Reduces Wrinkles
✓		Iron Less
✓		Works with all dryers
✓		No fuss or liquid mess

Bounce® dryer sheets keep clothes looking great, feeling soft and smelling fresh. Spend less time ironing, just toss Bounce® in the dryer and say goodbye to wrinkles and static!
