25 mm Combination Padlock TSA Lock with Cable

Operating Instructions: This product is preset at the factory to open at 0-0-0. To reset your combination lock to open with your own combination follow these simple steps:

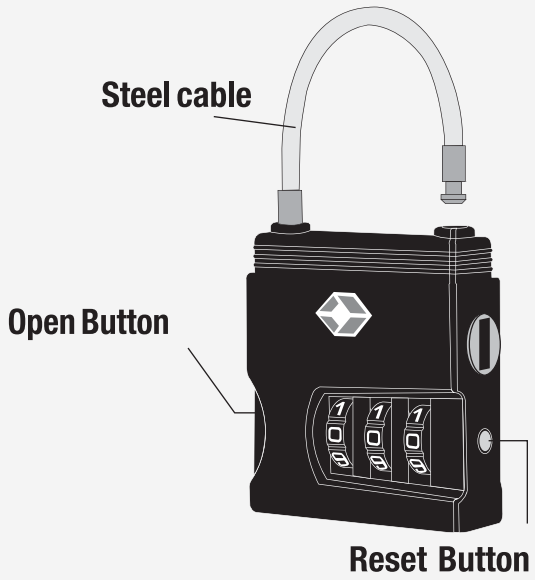

Step 1: Set the dials to 0-0-0 and push the large button on the side of the padlock

Step 2: With a pen depress the small silver button on the side of the padlock

Step 3: While holding the silver button down, select your new combination by turning the dials. Memorize the combination.

Step 4: Once you have selected the new combination, release the silver button.

The lock is now ready to be used.

The combination can only be changed when the lock is in the open position. Follow steps 1 through 4.
