

# INSTRUCTION GUIDE

## TOILET BASE PLATE

**1** Shut off water supply.

---

**2** Remove water supply.

---

**3** Unbolt toilet at base and remove toilet carefully.

---

**4** Clean off mounting surface of floor and level surface if necessary.

---

**5** Apply a bead of adhesive around the bottom of toilet base plate approximately 1" from the edge.

---

**6** Place and position toilet base plate on floor surface. Use alignment pegs to help align toilet base plate for straight toilet installation.

---

**7** Mount new toilet in place on top of toilet base plate per manufacturer's instruction. New wax ring and mounting bolts may be required to seal properly.

---

**8** Apply caulk around edge of toilet base plate and toilet base.

---

**9** Clean toilet base plate with a mild soap and water after caulk sets. Do not use solvent based cleaners.
