SETTING YOUR LAWN SPREADER

THESE SETTINGS ARE A GUIDE. They were determined by landscape professionals using new spreaders. The condition of your spreader, your walking speed, the roughness of the lawn, and even the humidity can affect how fast the lawn food comes out. Watch flow rate. If fertilizer appears to be coming out either slower or faster than you are covering your lawn, adjust the setting. Close the spreader when filling, turning or stopping.

Spreader	Setting Delivers 2.8 LB/1000 SQ. FT.

GUARANTEED ANALYSIS

Total Nitrogen (N) 32.00%
4.00% Ammoniacal Nitrogen
28.00% Urea Nitrogen*
Soluble Potash (K₂O) 5.00%
Sulfur (S) 4.50%
4.50% Combined Sulfur (S)
Iron (Fe) 5.00%
0.014% Water Soluble Iron (Fe)
Derived from Urea, Polymer Coated Urea, Ammonium Sulfate, Iron Sulfate and Muriate of Potash.
*12.00% Controlled release urea nitrogen from polymer coated urea.

ALSO CONTAINS NONPLANT FOOD INGREDIENTS

SOIL AMENDING GUARANTEED ANALYSIS

Active Ingredients:
0.15% Microbes
(CFU's per gram)
Bacillus subtilis-266,903
Bacillus licheniformis-266,903
Paenibacillus polymyxa-266,903
Bacillus pumilus-266,903
Paenibacillus durum-231,278
Bacillus amyloliquefaciens-231,278
Streptomyces hyaliscus-11,828
Streptomyces griseus-11,828
Trichoderma harzianum-11,828
Trichoderma viride-2,423
Inert Ingredients (as a soil amendment)
99.85% Fertilizer

Purpose: Microbes increase availability of water and minerals. For CFU's per pound, multiply grams by 454.

A lawn will typically utilize 1 to 4 pounds of nitrogen per 1,000 sq. ft. during the growing season. When utilized as directed, this product will supplement your regular fertilizer program by providing 0.896 pounds of nitrogen per 1,000 sq. ft. Please consult your local extension office for questions regarding a regular fertilizer program.

Information regarding the contents and levels of metals in this product is available on the internet at <https://www.aapfco.org/metals.html>

Information regarding the raw materials composing this product can be obtained by writing to the Guarantor listed on this label and referring to the batch number found on this container.

Store in original container, in a cool, dry place out of reach of children and pets.

Filled by weight, not by volume. Product may settle after packaging.

INSTRUCCIONES DE USO

Para obtener los mejores resultados, pde el césped y riéguelo bien uno o dos días antes de aplicar el fertilizante de césped Pennington® Full Season™. Realice una aplicación por temporada de cultivo.

- Llene el esparcidor y establezca los ajustes de acuerdo con la siguiente tabla.
- Aplique fertilizante sobre un césped húmedo o seco. Para una cobertura uniforme con un esparcidor de fertilizante, aplique el fertilizante alrededor del perímetro del césped y luego pase el esparcidor hacia adelante y hacia atrás dentro del área delimitada por la primera aplicación perimetral. Permita siempre un solapamiento para evitar huecos en la cobertura.
- Barra los gránulos de fertilizante sobrantes de las superficies duras hacia el césped.

Aplique solo al césped en crecimiento activo. No aplique cerca de agua, desagües pluviales o zanjas de drenaje. No aplique si se espera lluvia intensa. Aplique este producto solo en el césped y barra de vuelta hacia el césped cualquier producto que caiga sobre en la entrada, acera o calle. Consulte con su agencia de extensión cooperativa local para obtener información específica sobre las mejores prácticas de gestión del césped local. Consulte con el gobierno de su condado o ciudad para determinar si existen regulaciones locales para el uso de fertilizantes.

Consulte a su Servicio de Extensión Cooperativa Estatal para obtener información actualizada sobre las limitaciones anuales de aplicación para fertilizantes de césped en su región.

En Florida: No aplique a céspedes en el norte de Florida en invierno. No aplique este producto al césped Centipede más de 2 veces al año en el norte de Florida o más de 3 veces al año en el centro y sur de Florida.
