CARE and MAINTENANCE

Perhaps the greatest environmental damage to wood furniture comes from wide swings in relative humidity (RH) in our homes. Wood absorbs and desorbs water as relative humidity rises and falls, and in doing so it swells and shrinks. Making matters worse, it expands and contracts unequally along different grain directions. As humidity changes, the components of wooden objects are continually pushing and pulling against each other. This pressure often results in parts of furniture no longer fitting together closely or becoming distorted or breaking from their own internal stresses.

The response to relative humidity changes begins with determining the annual average RH for your particular space. Then try to keep the RH in the space where your furniture is as close to that average as possible, generally within about 10% up or down. De-humidify in the summer and humidify in the winter.

Be aware that raising the temperature lowers the humidity and vice versa. Thus, modern heating systems, which can drive down interior RH in the winter, almost invariably cause problems for furniture. To counteract their effect, you can either modify the RH by keeping furniture containing spaces cooler in the winter or most importantly, have a good working humidifier for your home. A humidistat automatically works to balance the humidity in your home so it is constant. Dry indoor air can suck enough moisture from its surroundings to do permanent damage to wood, causing it to crack or split.

Remember, that not all woods are created equal. Two factors that help determine how rapidly a wood will lose moisture are pore size and surface hardness. A piece made from a dense and hard wood will dry less rapidly than pieces made from softer woods.

Furniture that is sealed and lacquered will lose moisture more slowly than an unfinished piece while pieces with veneer finishes are not only stronger, but lose moisture more slowly than other finishes.

To help protect your wood furniture, take these steps:

- Use a humidifier, preferably one with an automatic control system that can sense the humidity level and adjust itself accordingly. Don't over-humidify; that can damage wood by causing it to expand and contract.
- Keep furniture out of direct sunlight, which can cause it to dry out, crack and warp.
- If you can avoid it, don't put furniture near heating vents. If you must, keep the piece 3 to 4 inches away from the wall, giving the heat and air space to circulate.
- Dust with soft dry cloth.
- Do not use liquid or aerosol products.
- To avoid marking, do not place rubber on surface (foot pads, etc.)
- For soil build-up, wipe with damp cloth & dry.
- Do not use abrasive cleaners.

FURNITURE TIP OVER RESTRAINT ASSEMBLY

WARNING

Serious or fatal crushing injuries can occur from furniture tip-over.
If the furniture tip over restraint kit is not in the box, please contact our customer service department in order to obtain another kit before using the furniture.

STEP-22

NOTE: The screwdriver is not included in the hardware pack.

FURNITURE TIP OVER RESTRAINT ASSEMBLY

Furniture Tip Over Restraint Instructions:

1. Attach one of the mounting brackets securely to the back edge of the furniture. Use the shorter screw.

2. Determine where furniture is to be placed and mark location on the wall for mounting bracket screw hole approximately 2 inches **below** the bracket mounted to the furniture.

3. Drill a 3/16 inch hole in the wall. Press the plastic anchor into the hole and gently tap until the flange on the anchor is against the wall surface.
4. Position the bracket over the anchor and use the longer screw to securely attach the bracket to the wall.
5. Place the furniture so the back edge is in line with the bracket on the wall.
6. Lace an end of the nylon zip-tie strap down through each bracket. Bring both ends together and slide the smooth side upright through the square-shaped end and pull through to create the "locked" position.
7. Check to make sure the strap is securely laced and locked to the brackets.

- **DO NOT** put a TV or other heavy objects on top of a chest of drawers or any other furniture not intended for use with a TV
- **DO NOT** place heavy objects in top drawers
- **DO NOT** let children climb or hang on drawers, doors or shelves
