

Standard Assembly Instructions for Arm Chairs

Tools Needed:

- Phillips screwdriver
- Allen wrench (usually included)
- Hammer or rubber mallet (optional)

Parts Included:

- Seat cushion
- Backrest
- Left armrest
- Right armrest
- Legs (4)
- Screws, bolts, washers, and nuts (packaged separately)

Step 1: Unpack and Organize

Remove all parts from the packaging.

Lay them out on a soft surface to avoid scratches.

Check all parts and hardware against the parts list.

Step 2: Attach the Legs

Locate the four legs and the corresponding screws/bolts.

Attach each leg to the bottom of the seat using screws or bolts provided.

Use the screwdriver or Allen wrench to tighten securely but avoid over-tightening.

Step 3: Attach the Armrests

Identify the left and right armrests (often marked).

Align the armrests with the pre-drilled holes on the seat.

Secure them with the screws or bolts provided.

Tighten with the Allen wrench or screwdriver.

Step 4: Attach the Backrest

Align the backrest with the attachment points on the seat and armrests.

Secure with the screws or bolts included.

Ensure everything is aligned before tightening fully.

Step 5: Final Check

Make sure all screws and bolts are tight and secure.

Check stability by gently pressing on the armchair.

Adjust any loose parts as necessary.

Care Tips

Clean with a soft, damp cloth.

Avoid harsh chemicals.

Check and tighten screws periodically for safety.
