

Ridge Cap ***Ridge flashing for metal roofing and shingle roofs***

Features: Flashing for hip and ridge roof sections.

Material; Ridge Roll ridge caps are made from coated 29 gauge steel for added corrosion protection, so that they will last over the life of the structure.
10' lengths. 10 per bundle.

Available finishes; Bare Galvanized or Galvalume & SP painted Galvanized

Ridge Roll; The ridge roll tops off differently than others, but still provides an unchanging classic look and commitment in shedding rain water.

Installation: The ridge roll ridge cap is placed on top of pre-glued closure strips (outside) and fastened by # 9 x 1 ½" metal roofing screws in an opposing manor directly across from each other into the high rib of the panel approx. 6" O.C.

Item No. 32821 - RIDGE CAP GZ 29 RC 2
