

Electrical Shock and Spark Hazard

- The inside of this device is designed to emit high-voltage shocks which can cause injury to humans. It is designed to produce a level fatal shock to rodents.
- Turn off power before handling trap. Never insert hands or any object into the chamber unless the power is turned off and the batteries are removed.
- Keep children away from this product.
- The shock will create internal sparks which can ignite or explode flammable vapors, liquids, or dry combustible solids.
- Do not place trap near areas containing flammable vapors, liquids, or dry combustible solids, or in areas where these objects are stored.
- This may be fatal to a small or newborn pet that can enter product.
