

18 in. x 22 in. Sump Pump Basin

Made in the USA

For sump applications, the Everbilt 18 x 22 in. Sump Pump Basin is designed to hold a sump pump. It is ideal for basement applications where a submersible or pedestal sump pump is required. The single piece basin is injection molded structural foam polyethylene and provides superior structural toughness and reliability. The rim of the basin includes pre-drilled holes with metal inserts to accept the mounting and securing of a cover. The ultra strong reinforced bottom will not buckle, deform or puncture, even under the harshest soil or ground water conditions. The 18 x 22 in. Sump Pump Basin will provide decades of reliable service. The cover for the basin is sold separately.

Specifications

- **Material:** Polyethylene Structural Foam
- **Inserts:** Metal
- **Weight:** 11 lbs.
- **Total Capacity:** 20 gallons

Store SKU #100027544

Features and Benefits

- 20 gallon capacity
- Heavy duty structural foam injection molded construction
- Ultra strong, reinforced bottom will not flex
- Cover mounting metal inserts included on basin
- Gas and radon tight
- Odor free
- Dozens of cover options available
- Available perforated with 48 factory drilled, 5/16" holes (Model SF20DR)
