ALEX FLEX®

Premium Molding & Trim Sealant

DAP® ALEX FLEX® is specifically formulated for use on difficult interior molding and trim projects. Get professional results fast and finish projects right the first time.

- **Crack Proof** – Flexible enough to endure expansion & contraction. Meets ASTM C920, Class 12.5
- **Outstanding Paintability** – Professional finish, won't shine through paint
- **Finish Faster** – Paintable in 30 minutes
- **Ideal for Natural & Synthetic Materials** – High-performance formula seals wood, MDF, PVC, polystyrene & composite molding
- **Easy Application & Clean Up** – Smooth application & tooling, cleans up with soap & water
- **60 Year**

Flexible, Fast, Finished!

ALEX FLEX®

Superior Performance for Molding & Trim Applications

IDEAL FOR
WOOD, PVC & COMPOSITE
MOLDING

Paintable in
30
Minutes

60 YEAR DURABILITY

DID YOU KNOW?

Molding & Trim is one of the most demanding applications for a sealant

MULTI-PIECE trim & crown molding can have 5 or more moving parts that must be sealed.

NEW WOOD will shrink as it dries after installation, causing cracks in seams.

SEASONAL CHANGES cause wood trim to contract in the winter (heat use) and expand in the summer (humidity), stressing seams year-round.

“SHINERS” are unsightly glossy spots that appear when some flexible sealants are painted.

SYNTHETIC TRIM (especially PVC, polystyrene & composite) is a growing application and requires a sealant with outstanding adhesion.
