## HW56594

### Expandable Garment Rack

#### Assembly Steps:

|                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>① Screw the Leveling Feet(M) into the bottom of 8 pieces Lower-Pole(C).</p>                                                                                                                                                                                                                                                      | <p>② Snap the Plastic Clips(K) into the pole grooves of 8 pieces Lower-Pole at the same position and make sure that the arrow of plastic clips are pointed up.</p>                                                                                      | <p>③ Please make sure Square Wire Shelf (A) the correct way up. Hold the wire shelf on its side and slide the top of 8 pieces lower poles through the bottom of each wire shelf at its corners until there is snug fit. After 8 pieces poles have been slid through the shelf collar holes, set the shelf upright.</p> |
| <p>④ Snap 8 pieces Plastic Clips into the pole grooves as following photo to assemble the 2nd square wire shelf.</p>                                                                                                                                                                                                                | <p>⑤ We suggest to assemble another side of square shelving by references to the first ready one, please make sure each layer of shelves are same height.</p>                                                                                           | <p>⑥ Screw the 8 pieces Middle-poles(D) into the 8 pieces lower -poles by screw connectors which is already on the middle -poles as following photo.</p>                                                                                                                                                               |
| <p>⑦ Fix the plastic clips as step④ at the same height of 4 pieces poles as following photo, then slide down the Support Rails (G) from the pole top onto the plastic clips. Pls make sure assembly position of support rail is correct.</p>                                                                                        | <p>⑧ Fix the plastic clips as step④ to assemble the 3rd square wire shelf.</p>                                                                                                                                                                          | <p>⑨ Screw the 8 pieces Upper-Pole into the 8 pieces Middle-poles by screw connectors which is already on the Upper-poles as following photo.</p>                                                                                                                                                                      |
| <p>⑩ Fix the plastic clips as step④ to assemble the 4th square wire shelf.</p>                                                                                                                                                                                                                                                      | <p>⑪ Fix the plastic clips as step④ at the same height of 4 pieces poles as following photo, then slide down the Support Rails With Hooks (F) from the pole top onto the plastic clips. Pls make sure assembly position of support rail is correct.</p> | <p>⑫ Snap 16 pcs plastic clips on the 8 pieces upper-poles as following photo, and then assemble the Top Wire Shelf (B) on the top. And then pushing firmly down on every shelf at corners by rubber mallet to ensure the shelf in a place over the plastic clips.</p>                                                 |
| <p>⑬ Adjusting a proper length of 2 pieces expandable hanger rods as you like and make sure the length A is equal to the length B of two square shelving units. And then screw 2 pcs Expandable Clothes Hanger Rods (H) by Steel Screw &amp; Brackets (I) onto the 2 pcs Support Rail With Hook (F) and 2 pcs Support Rail (G).</p> | <p>⑭ Put PP Mat (J) onto all Square Wire Shelf.</p>                                                                                                                                                                                                     | <p>⑮ At last, attach two back poles as following photo to the wall by Anti-Tip Kits (L) to prevent rack unit from tipping over. Then a Expandable Garment Rack is well assembled.</p>                                                                                                                                  |

| No.      | A                 | B              | C          | D           | E          | F                       | G            | H                      | I                     | J      | K             | L             | M             |
