

FIRST THINGS FIRST

1 Connect your WiFIRE® Grill to your home network via the Traeger App.

2 Season your grill.

ONBOARDING PART I: CONNECTING YOUR GRILL

Our dedication to delivering world-class products and experiences means we are constantly working to improve grill performance and features. We highly recommend connecting your Traeger® Woodridge™ Grill to WiFIRE® by following the instructions below. When your grill is connected and on, updates will automatically download, ensuring your grill is always operating at peak performance.

IMPORTANT:

- Make sure your smart device is running on the latest operating system and that Bluetooth® is turned ON.
- If using an Android device, turn on location services.
- To connect your grill to your home Wi-Fi, your grill must be powered on. Make sure the main power switch is pressed to ON (I) and lit up.
- Your home Wi-Fi router signal must be 2.4 GHz (a dual band router should also work). The 2.4 GHz band is currently industry standard for connected appliances. It has better range and penetrates walls/ceilings/obstacles better than 5 GHz, which your grill cannot recognize.

Go to the Apple App Store or Android Google Play Store to download the latest version of the Traeger App.

Ensure your smart device is connected to the Wi-Fi network to which you want your grill connected. The router signal must be 2.4 GHz, as the grill is not compatible with 5 GHz.

After powering on your grill, tap the menu button. You will see the Wi-Fi grill icon light up in the menu bar below the dot matrix, and an animation of a Wi-Fi signal with a question mark will be displayed. Press the selection dial to select this option and begin the connection process.

NOTE: You can navigate menu options by turning the selection dial after tapping the menu button. As you turn the dial, the menu bar icons below the dot matrix display will light up to indicate your selection.

A green checkmark will display on your controller to indicate that you have successfully connected to Wi-Fi. The Wi-Fi icon in the top right above the dot matrix display will stay lit up when the grill is connected.

After selecting Wi-Fi, the pairing animation above will display on screen, indicating that your grill is broadcasting its Bluetooth signal and is ready to pair. Open your smart device to the Traeger App and sign in to your account. On the home screen of the Traeger App, tap the grill icon in the lower center of the screen to start connecting.

Follow the instructions on the Traeger App to (1) pair your phone to your grill (via temporary Bluetooth connection), (2) connect your grill to your desired 2.4 GHz home Wi-Fi network, and (3) complete the grill setup process.

Once connected to Wi-Fi, you might see this animation on your screen. Don't turn off your grill until you see a green checkmark. This means that your grill is downloading and applying an update. Just like your smartphone, these updates keep your grill running smoothly, securely, and at peak performance. Once the update is done, you'll see a green checkmark and the grill will return to the idle mode – let's cook!
