

Enviro-Log[®]

earth friendly fire

BETTER VALUE THAN WOOD

Burning Instructions

FIREPLACES* OR OUTDOORS

1. Fully open fireplace damper.
2. Tear open seam, loosen wrapper.
3. Place one or two firelogs on grate. (See FIGURE 1)
4. Seam up; light ends of wrapper. (See FIGURE 2)
5. Always use a fireplace screen.
6. Check & manage your fire regularly.

WOODSTOVES*

1. Tear open seam, loosen wrapper
2. Place one firelog on grate. (See FIGURE 1)
3. Seam up; light ends of wrapper. See FIGURE 2)
4. Check & Manager your fire regularly.

* It is recommended that Enviro-Logs be added, as needed, one at a time to an existing fire. Check and manage fireplace and woodstove fire regularly.

FIGURE 1- Loosen wrapper & place on grate - seam up.

FIGURE 2- Light ends of wrapper.

Caution – Risk of fire

The Enviro-Log Firelog is designed to light easily and quickly with a match or butane utility lighter. **DO NOT** use flammable liquids or fireplace gas log lighters to ignite the firelog.

To Extinguish Firelog in case of emergency use a UL dry chemical fire extinguisher, or carefully apply water, sand or a wet towel.

Great Firelogs For Our Environment

Enviro-Log[®] firelogs can be used in any sound and proven (UL listed & masonry) approved wood burning fireplace, woodstove, chiminea, or outdoor fire pit. Enviro-Log uses 100% recycled wax boxes. Our firelogs are easy to light and enjoy a fast, clean fire everyday. Add additional Enviro-Logs as desired. Always use with adequate air supply. Please extinguish all open fires.
