Install the water filter

You can find in the top-right corner of the refrigerator compartment.

You can find in the bottom-left corner of the refrigerator compartment.

Step 1: Notice the correct direction, when you install the filter.

Step2: Install the filter according to the blue label arrow direction and close the cover.

Note: You can press down firmly, it won't harm the connector or the fridge.

Note: If you are unable to close the filter housing cover with the filter installed , press in the direction of the pink arrow to remove the filter and then proceed to install it again by following Step2
