## Use and Care

### Brita® Redi-Twist™ Filtration System USS-323

Usage and quality of water in your incoming water line affect the life of filter cartridges. Cartridges should be replaced sooner if water pressure at the faucet begins to drop noticeably or if the filter fails to perform satisfactorily.

After prolonged periods of non-use, it is recommended that the filter system be flushed thoroughly. Let water run for 10 minutes before using.

The Redi-Twist™ filters used with this filter system has a limited service life. Changes in taste, odor, and/or flow of the water being filtered indicate that the filter should be replaced.

Please see the Performance Data Sheet for the certified performance of specific systems with stated cartridges.

System	Filter Model Numbers
USS-323 Redi-Twist™ 2 Stage Filtration System	Stage 1: USF-203 - Carbon Filter
Replace filters every six months or sooner.	Stage 2: USF-201 - Carbon Filter
