

Quick Start Guide

Kidde Wire-Free Alarm Network Setup
Please Read All Instructions First!

1 Power Up All Devices

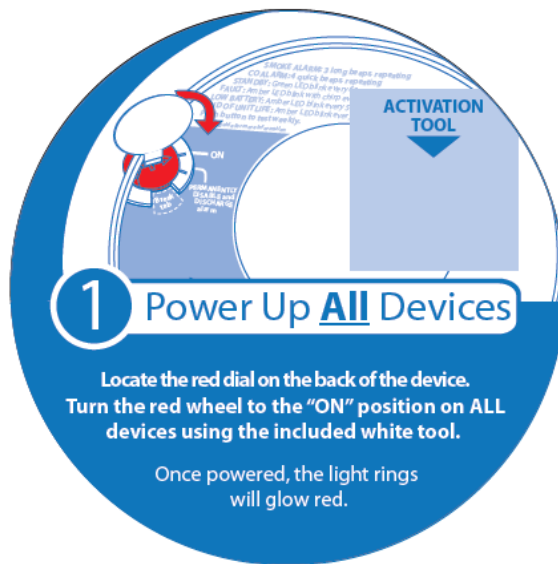

Locate the red dial on the back of the device.
Turn the red wheel to the "ON" position on ALL devices using the included white tool.

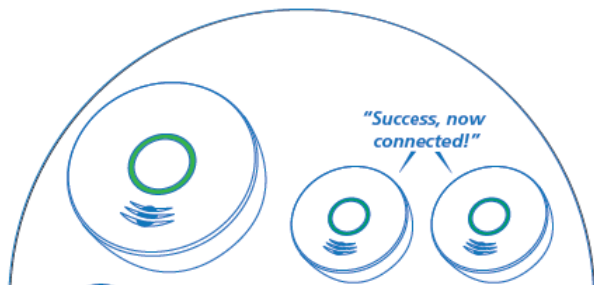

Once powered, the light rings will glow red.

2 Pick One Device

Press & hold the button on only ONE device until you hear 2 beeps. Release button. You will hear "Searching for other devices!".

The light will pulse green and sound a continuous "sonar" ping until step 4 is completed.

3 Relax and Wait

Wait until all devices have connected to network.
Once connected, each device will speak:
"Success now connected!"

Once connected, the lights will glow green.

4 Pick One Device

Press & hold the button on only ONE device until you hear 2 beeps. Release button. "Sonar" ping will stop.

Hold for 5 seconds

Device will announce that setup is complete and the number of connected devices.

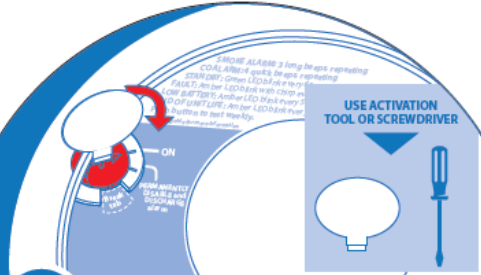

5 Setup Complete!

If all devices flash green and the "sonar" ping has stopped, the devices are now connected. Congratulations!

Please mount alarms in your home. Refer to user guide for detailed installation instructions.

Adding a Device

1 **Power Up New Device**

Locate the red wheel on the back of the device. Turn the red dial to the "ON" position on the device being added using the white activation tool or a standard screwdriver.

Once powered, the light ring will glow red.

PHONE ALARM: Ring for up to 10 minutes
COALARMS: Green LED lights for up to 10 minutes
FAULT: An LED light every 10 seconds
LOW BATTERY: Another LED light every 10 seconds
OUT OF BATTERY: Another LED light every 10 seconds
No light for 10 minutes

USE ACTIVATION TOOL OR SCREWDRIVER

2 **Pick One Installed Device**

Press & hold the button on only **ONE INSTALLED** device on your network until you hear 2 beeps. Release button. You will hear "Searching for other devices!".

Light will pulse green and sound a continuous "sonar" ping.

Installed Device Device Being Added

"Searching for other devices!"

3 Relax and Wait

Wait until the new device has connected to the network. Once connected, the new device will speak: "Success now connected!".

Once connected, the light ring will glow green.

4 Pick the **Installed** Device

Press & hold the button on the **INSTALLED** device for **5 SECONDS** until you hear 2 beeps. Release button. "Sonar" ping will stop.

Device will announce that setup is complete and the number of connected devices.

Resetting Your Device

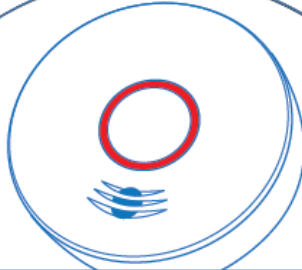

"Resetting wireless settings!"

Hold for 8-9 seconds

1 Resetting the Device

Press & hold the button on the device for 8-9 seconds until you hear 3 beeps. Release button. You will hear the words "Resetting wireless settings!".

2 Resetting the Device

Light ring will flash green once and then it will pulse red. You will hear the words "Ready to connect, follow quick start instructions!".

Device has been reset.
