

Quality assortment of low-maintenance

Watering

Once every 2-4 weeks, as needed.

Temperature

60-80°F (15-27°C)

Light

Filtered sunlight, plenty of natural light or outdoors in partial shade.

Fertilization

Once a month during the growing season (spring - summer).

Soil

Use well-draining soil mix.
Add perlite or coarse sand.

Pests and Diseases

Treat any infestations with insecticidal soap or neem oil.

Pruning

Use clean, sharp scissors or pruning shears to remove dead or damaged leaves.

Repotting

When succulents outgrow their containers or the soil becomes depleted of nutrients.
