## STOP THE DESTRUCTIVE CYCLE

Scotts® GrubEx,® kills grubs as they develop, BEFORE they cause damage to your lawn. Apply GrubEx,® spring to early summer.

**SPRING**
Grubs come out of winter hibernation and start to eat your lawn's roots. By late spring, grubs enter the pupa stage to transform into beetles.

**SUMMER**
Adult beetles surface to feed on your garden and lay eggs back in your lawn. Eggs hatch into new grubs, which will begin to feed on your lawn's roots.

**FALL**
Between the summer stress and the feeding grubs, your lawn can be severely damaged. After feeding in the fall, grubs will hibernate during the winter and resume the destructive cycle in the spring.

Kills: White Grubs (including larvae of): Japanese Beetles, Asiatic Garden Beetles, Black Turfgrass ataenius, Aphodius spp., European chafers, Green June Beetles, May/June Beetles, Northern masked chafers, Caterpillar (including Armyworms, Cutworms, Sod webworms), Billbug grubs, Crane fly larvae (including European Crane Flies). Suppresses Chinchbugs.
Apply Fall (Oct-Dec) to control Crane fly larvae (including European Crane Fly).
