### **Polka Dots**

Looking for an inexpensive way to decorate your nursery? Try polka dots. All you need is ScotchBlue™ Painter's Tape, a little bit of paint, and a few supplies you may already have at home. With a few simple steps, you'll have a playful pattern that your kids will grow to love.

### TOOLS

- ScotchBlue™ Painter's Tape
- Paints, brush, roller & tray
- 5-in-1 tool/putty knife
- Wax paper
- Utility knife

### **PREPARATION**

- Remove any wall hangings (pictures, nails, fixtures)
- Fill nail holes, then use sandpaper to smooth the wall
- Make sure wall is clean, dust-free and dry completely

## Step By Step Guide:

Step 1: Mask & Paint Base

Mask trim, baseboards and nontextured ceilings with ScotchBlue™ Painter's Tape. Hint: use the chart on page 2 to find the right tape for your project. Paint the wall your lighter base color, and let it dry for 24 hours.

Step 2: Draw Template

Overlap strips of tape on a piece of wax paper. Seal the edges with long strips of tape. Then trace a circle onto the tape using a coffee can lid or plate as a guide.

Step 3: Cut Out Circles

Cut out the circle with a utility knife. You now have one polka dot template and one polka dot center. Repeat steps 2 and 3 to create enough templates for each polka dot in your wall pattern.

Step 4: Lay Out Design

Tape the polka dot centers (the circles you cut out) along the wall to lay out your design. This will allow you to easily adjust the pattern and make sure you like it before you set the template and start to paint.

Step 7: Paint the Dots

Apply the darker accent paint to the polka dot templates. Let the paint dry for 24 hours.

Step 5: Set the Pattern

Place polka dot templates over polka dot centers, with the wax paper facing the wall. Peel the wax paper from back side of template and press remaining tape to the wall. Remove polka dot center.

Step 8: Remove Tape

Carefully remove tape at a 45° angle. If paint starts to lift, use a sharp tool to cut along the painted tape edge.

### Step 6: Seal Edges

Smooth the inner tape edges by pressing with a 5-in-1 tool or flexible putty knife. **Hint:** to enhance your paint lines, seal the inner tape edges with wall base paint. Allow 12-24 hours to dry.

# Helpful Hints

#### SIZE AND SCALE SUGGESTIONS

- Consider the size of the room as you determine how big or small your polka dots will be.
- Larger dots may make a small room look and feel even smaller. If the dots are very small, they may get lost in a larger room or get hidden in room full of large furniture.
- Keep patterns to a minimum and low on the wall for a clean, uncluttered design.

## **PAINT POINTERS**

- When selecting a color palette for your nursery, consider non-traditional colors such as greens and yellows.
- Choose colors that will complement or enhance the furnishings you already have in the room.
- Before you buy, consider bringing home paint swatches or samples, to get an idea of how the colors will look together
  in your space. It's a great way to avoid time-consuming painting mistakes.

TAPE TIPS
Run Tape in Circles

An alternate way to create the dots: use a template to draw circles directly on the wall. Then use small pieces of tape to mask around each circle.

Seal the Deal

To sharpen your paint lines and prevent seepage, seal the inner tape edges with a coat of your base color. Allow 12-24 hours to dry.
