

THANK YOU FOR YOUR ORDER

Gotta Go Grass was developed for your pet's safety and ease of use. Follow these simple guidelines to insure you get the most out of your Gotta Go Grass:

-  Open the box and set the grass and tray in desired location, make sure it gets lots of light and air!
-  Gotta Go Grass is a natural, living system. Long shipping intervals may cause some yellowing. Don't worry! Generally, within one day of opening the box and providing fresh air, the Gotta Go Grass will regain its lush green appearance throughout.
-  You may notice small pebbles in the box, they are a part of the system's design for absorption and odor control. They are no toxic and will not harm your pet. Simply discard loose pieces in the trash.

ABOUT US

Bethel Farms is 4,000 acres of farmland spread across the state of Florida. Beginning in 1958 as a small cattle and poultry operation the company has blossomed to become one of Florida's leading agriculture companies producing cattle, citrus, sod, and grass plugs.

Bethel Farms is a steward of the land and conscious of everything done on the farm. We take an active role in in how we impact the environment. Whether it's providing the latest genetics for turfgrass varieties that demonstrate better drought tolerance and water efficiency, or the innovative ways we use irrigation tiles to cut water waste, our efforts are making the land we farm and the world we all call home a better place for us all.
