- ✓ Walkways & Steps
- ✓ Planter Boxes
- ✓ Park Benches & Picnic Tables
- ✓ Patio Pavers

FEATURES & BENEFITS:

- ✓ Waterproof
- ✓ Impervious to insects
- ✓ Will not rot or decay
- ✓ Maintenance-free
- ✓ High strength & durability
- ✓ No painting or staining
- ✓ Sustainable & environmentally friendly
- ✓ No splinters or cracking
- ✓ UV-stabilized
- ✓ Made in the USA with recycled HDPE plastic
- ✓ Excellent for ground contact applications

LANDSCAPE TIMBERS:

- 3" x 4"
- 5" x 5"
- 4" x 4"
- 6" x 6"

DIMENSIONAL LUMBER:

- 3" x 4"
- 2" x 4"
- 4" x 4"
- 2" x 6"
- 5" x 5"
- 2" x 8"
- 6" x 6"
- 2" x 10"

PRODUCT GRADES:

- ◆ G – Non-Structural
- ◆ S – Standard
- ◆ U – Utility

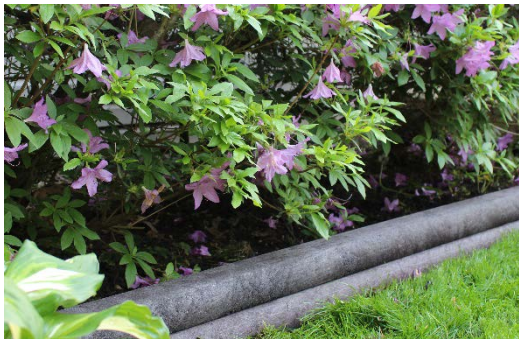

Best Plastic Lumber U.S. (BestPLUS), a sustainable plastic lumber manufacturer, provides durable, low-maintenance lumber to a range of industries. We manufacture utility-grade lumber from recycled plastic for use in various landscaping applications. Drop shipping and private label programs available.

LANDSCAPING APPLICATIONS

RAISED GARDEN BED:

BestPLUS plastic lumber is great for raised garden beds. Growing plants, flowers, and vegetables has many advantages such as excellent drainage, barriers to insects, and weed control. Unlike pressure treated wood, plastic lumber boards do not leech harmful chemicals and last for years.

GARDEN EDGING:

Garden edging provides an aesthetically pleasing finish to any landscape. BestPLUS lumber edging helps prevent mulch, landscaping rocks, or other media from entering the grass or walking pathway. Landscape timbers provide a level of protection to manicured plants and vegetables from weed cutting equipment. Wood timbers often crack and rot while plastic lumber timbers maintain their aesthetic look and functional purpose over time.

PARK BENCHES & PICNIC TABLES:

Recycled plastic benches and picnic tables provide years of use without the maintenance required with natural wood. BestPLUS plastic lumber will keep its finish for many years.

RETAINING WALLS:

Retaining walls made from recycled plastic offer many advantages over railroad tie materials which are often soaked in creosote. Plastic lumber, ideal for ground contact applications, provides a visually beautiful look while also being "green." BestPLUS plastic lumber provides years of service whereas wood products retain water and degrade over time.
