SECURITY & WARNINGS

In this section, you will find all the important information you need to be aware of before engaging in using your chimney brush. Safety should be your top priority while using this product.

Please read this information carefully, as improper use could damage the chimney brush.

- Use professional drills for power sweeping with a safety auxiliary handle that will stop the drill immediately when necessary.
- Use drills with a speed range from 350rpm to 2000rpm, 24V or above DC powered drill, or 500W and AC powered drill.
- Use your drill to rotate the chimney brush gradually and evenly, and avoid sudden trigger press, which will cause sudden high torque force to damage the rods and chimney.
- Never grip the rods too tightly; this could pull your gloves off.
- When connecting the rods, keep them as straight as possible.
- Never keep the rods spinning in the chimney if you are not moving the

rods up or down, as friction can cause the rods to heat up and possibly break.

- Do the sweeping only when the stove and chimney have cooled down already;

OPERATION

How to use:

- 1, Connect the rods one by one
- 2, Attach the bristle with rods
- 3, Put the brush into the flue.
- 4, Slide the rod into the flue.
- 5, Attached the drill with rod
- 6, Start cleaning the chimney

STORAGE

Store the chimney brush in a cool, dry place.

APPLICATION

This chimney cleaning tool can effectively sweep away soot and creosote buildup inside the chimney or on the roof to help prevent flue fires.

- The chimney brush is suitable for flues of various shapes and sizes. It can clean other difficult-to-reach areas quickly&easily.

- When the chimney is cleaned, the air enters the chimney more smoothly, which can help burn more completely in the fireplace and make the room warmer in winter.
