

Follow the instruction and finish your project in short time!

How to install

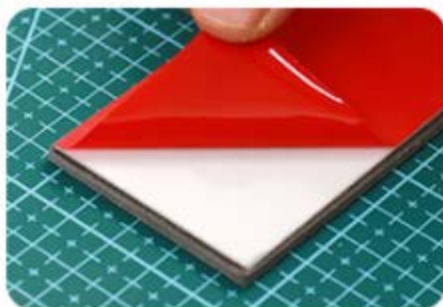

1 Clean the wall
Make sure the wall is clean, flat, smooth and dry before starting your project

2 Draw the guideline
Measure the wall and draw the guidelines with a level

3 Cut the backsplash
Cut the jagged side of the first tile then start the corner

4 Peel and Stick
Make sure the wall is clean, flat, smooth and dry before starting your project

5 Align your tiles
Align your tiles carefully, overlapping only on grout line

6 Finished the project
Effortless DIY, Easy & Quick

Recommended Surface

smooth ceramic tiles backsplash, smooth glass tiles backsplash, acrylic wall panel, painted gypsum, wall linoleum, stainless metal, mirror, laminate, wallpaper (if some corners are peeling, just peel them off and install tiles over them).

Non-Recommended Surface

oily wall, brick wall, stucco wall, stone wall, unfinished wall (gypsum or plaster), unpainted plywood.
