

Thank, You

for bringing me home!

Spruce Me Up

I've been in a dark box traveling. Here are some quick tips to get me settled:

- Remove yellow leaves or broked stems.
- If my soil is dry, give me a drink of water.
- Set me in the right light.

PLANT CARE

Bromeliad

Light

I like bright, indirect light where I cast a strong shadow at least a couple of hours a day, but don't mind medium light.

Water

I don't want my roots to stay wet, so let the top inch or two of the potting soil dry before you water me again.

Food

I don't need a lot of fertilizer, so you can feed me as my flowers fade to encourage my pups to grow strong.

Features

Bold and exciting, I show off exotic flowers and strappy leaves that instantly add a tropical touch to your space.

Growing tips

I like above-average humidity, but deal with regular humidity levels just fine. After my flowers fade, I start to die back but offshoots -- called pups -- will form at the base and grow into new plants.

Give me friends! I play well with:

Anthurium, Kimberly Queen Fern , Arrowhead
