HOME DECORATORS COLLECTION

Quick Mount Bracket Shelf - Manual

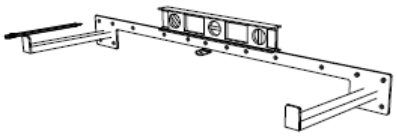

Includes:
(1) shelf
(1) mounting bracket
(4) screws
(2) drywall anchors
(1) set screw

Suggested Tools:

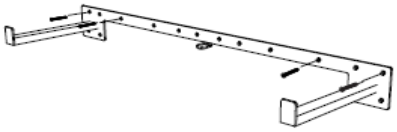

Make sure that at least one screw will be installed into wall studs for best results. Use stud finder (not included) to locate wall studs to hold the maximum weight.

1 Locate the wall studs. Place bracket against wall in the desired position. Using a level mark desired holes for screws with a pencil. Remove bracket.

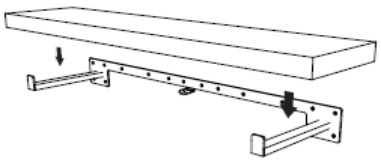

2 For the holes without the wall stud, use a power drill and a 3/32" drill bit. Drill holes into the wall at the pencil mark. Insert anchor.

3 Line the bracket up with where the wall stud holes are marked, using the drill, install the screws into the studs (or anchors) to secure the bracket to the wall.

Note: If you are drilling into a wall where no studs are available, use the proper anchors to mount the bracket. Anchors have been provided for this purpose. Additional drywall anchors may be necessary depending on stud placement.

4 Place shelf onto bracket line up hole on shelf with the set screw tab. Install set screw.
