WINDOW CURTAIN STYLE GUIDE

CURTAIN ROD

Ideally, a curtain rod should be mounted 4" ↕ above the window trim.

Mount the brackets about 2" to 4" ↔ from either side of the window trim.

Curtains typically reach the floor.

Curtains typically puddle on the floor.

84"

96"
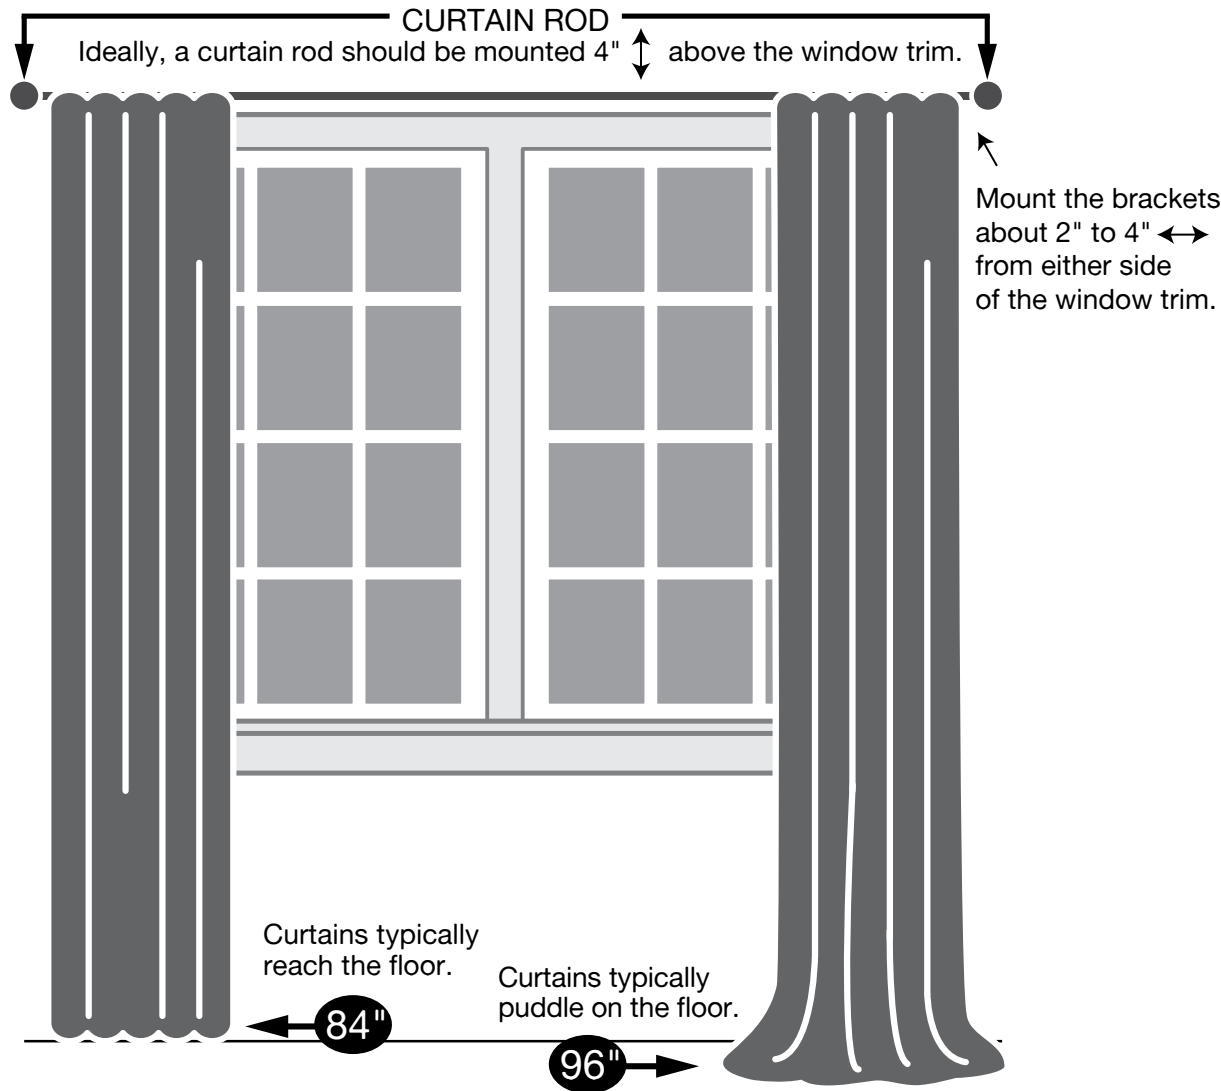

For proper fullness, fabric should measure approximately 2 to 3 times the width of your window.

Additional Styling Tips:

• Thoroughly steam panels to free them from creases.

• Evenly spread the panels out enough to see the texture but not to the extreme that the panels lay flat. Ensure that both panels are spread/gathered evenly to give a symmetrical look on the window.

• Tuck top corner edges of panels in for a polished appearance.

• Double check that rod and curtains hang straight.
