Upgrade · The Home Creator Way

30M+ Users
200+ Warehouses Worldwide
50+ Countries

VEVOR is a home improvement brand empowering Home Creators to upgrade spaces with pro-level products at exceptional value.

We deliver superior performance through practical tech innovation that blends purposeful technology with the hands-on joy of creation.

We break down price barriers so every upgrade reflects your vision to life.

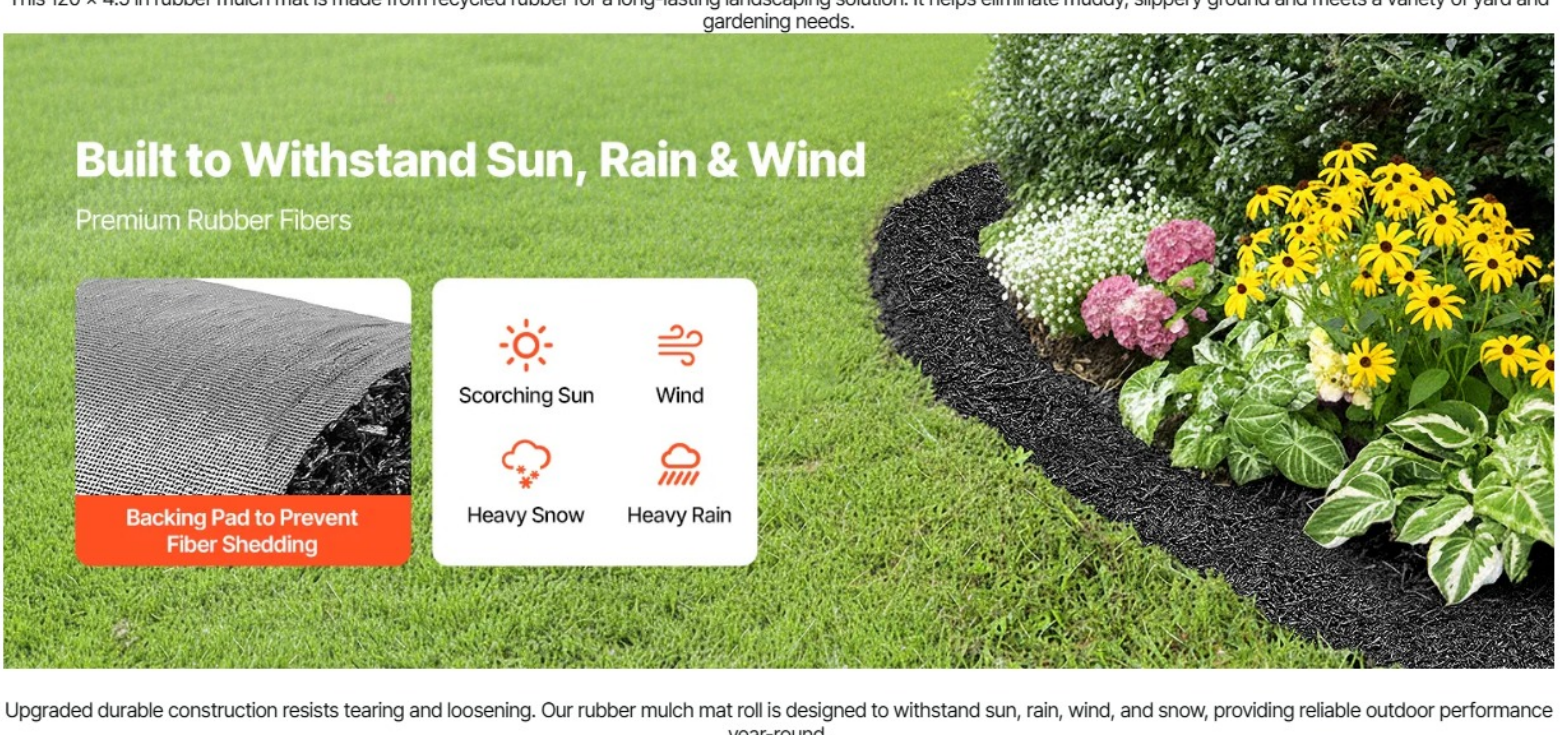

Upgrading every space isn't just a task—it's a declaration of reinvention.

Upgrade with VEVOR!

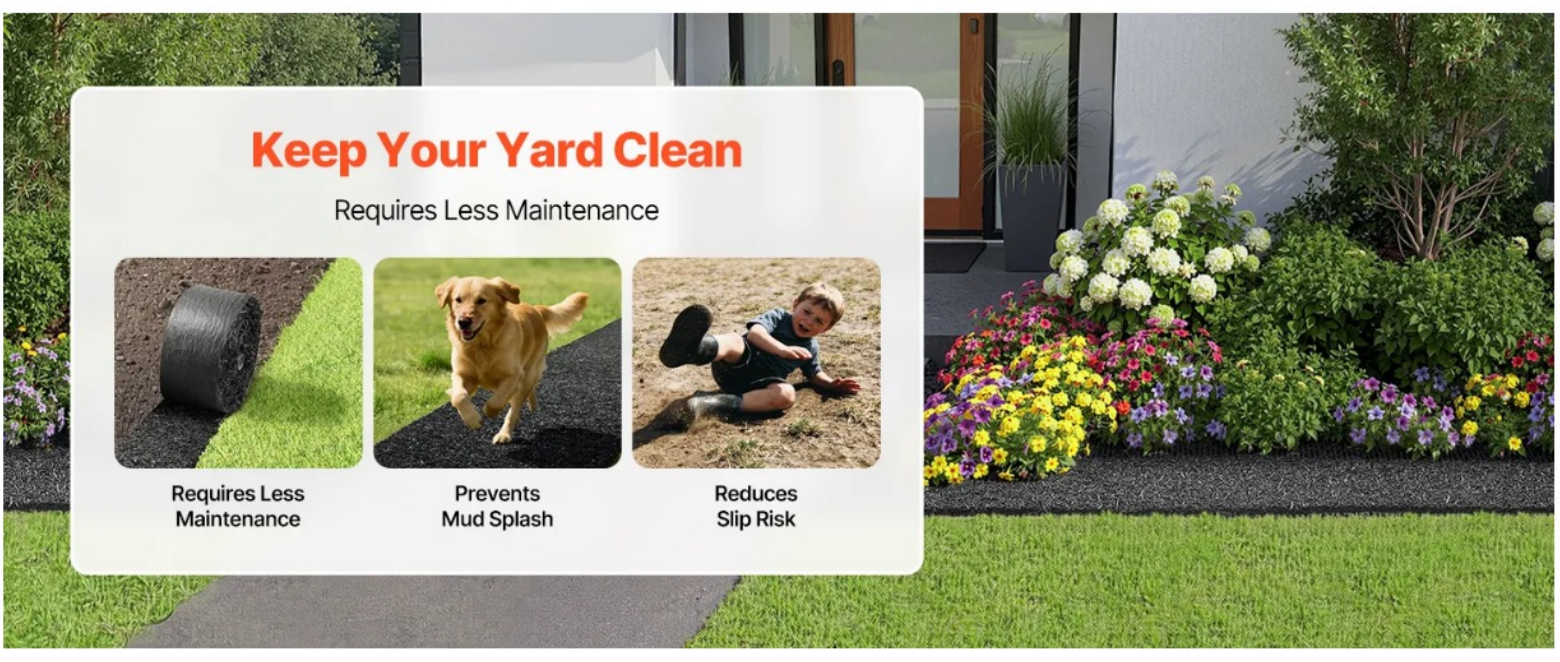

Enjoy a Clean, Well-Kept Yard

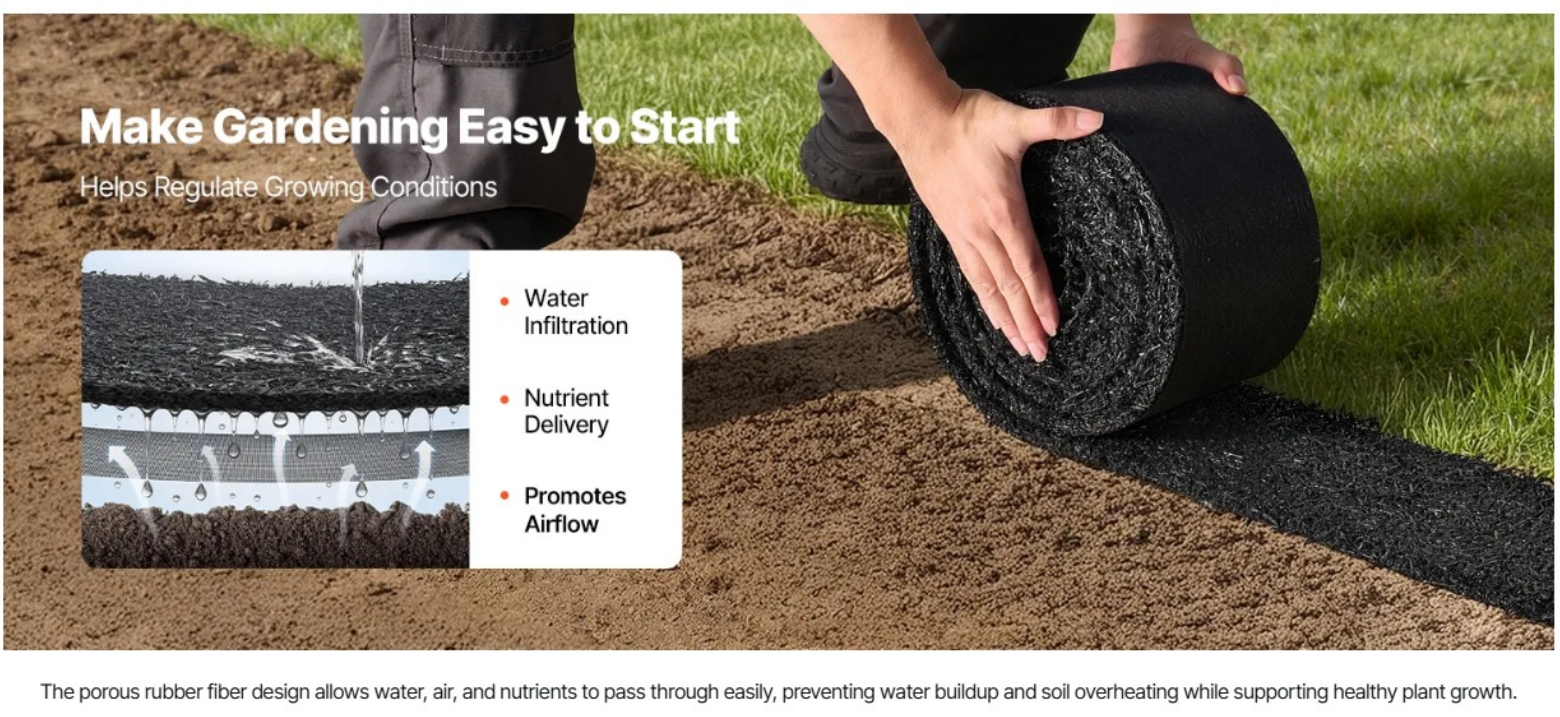

This 120 × 4.5 in rubber mulch mat is made from recycled rubber for a long-lasting landscaping solution. It helps eliminate muddy, slippery ground and meets a variety of yard and gardening needs.

Upgraded durable construction resists tearing and loosening. Our rubber mulch mat roll is designed to withstand sun, rain, wind, and snow, providing reliable outdoor performance year-round.

Interwoven rubber fibers combined with a backing cloth block sunlight from reaching the soil, helping control weed growth while reducing muddy, slippery surfaces after rain.

The porous rubber fiber design allows water, air, and nutrients to pass through easily, preventing water buildup and soil overheating while supporting healthy plant growth.

The recycled rubber mulch roll can be trimmed effortlessly with gardening scissors to fit your space or layout. Includes metal U-shaped stakes for easy securing. It is ideal for yards, vegetable gardens, and orchards.

Item Model Number: **HJ6004-2**
Maximum Length: **120 in / 305 cm**
Color: **Black**
Count: **4 Rolls**
Material: **Rubber (Recycled Tires)**
Width: **4.5 in / 11.5 cm**
Thickness: **0.5 in / 1.3 cm**
Net Weight: **26.3 lbs / 10.95 kg**
Single Item Size: **120 × 4.5 × 0.5 in / 3050 × 115 × 13 mm**
Included Accessories:
Metal U-Shaped Ground Stakes × 40、User Manual × 1

NOTE: Made from recycled rubber.
Please unpack and air out for 12 hours to reduce odor.

100% Recycled Rubber Fiber Construction for Long-Lasting Outdoor Durability
Made from 100% reclaimed rubber fibers glued together with an adhesive, the VEVOR rubber mulch mat roll is a long-lasting and effective way to landscape. This material does not break down as wood mulch or fabric covers do. It withstands UV light, weathering, and seasonal decomposition. You get something that stays the same size, color, and shape for a long time.

The recycled rubber used to make the mat also makes it resistant to wear and pests. The dense rubber material naturally keeps bugs and rodents away, so your flower beds stay clean without using chemicals. This mulch mat roll provides the kind of long-lasting performance that regular organic mulches just can not match, whether it is used in residential yards, vegetable gardens, or business landscaping.

0.5 in Thick Profile with Green-Energy Adhesive Backing for Tear Resistance
Each roll in this 4-pack is 0.5 inches thick, making a strong physical barrier that can withstand foot traffic, yard tools, and environmental stress. An adhesive holds the strengthened backing cloth together. This feature means the mat stays together even when bent, cut, or moved. It keeps the rubber mat from breaking and coming apart, which can happen with cheaper mats.

It is also better at keeping weeds away over time because the mat is thicker. A thicker mat blocks more light and makes it harder for roots to penetrate, so you do not have to pull weeds by hand or use herbicides as often. It makes the rubber mulch mat roll a useful update for gardeners who want to keep weeds under control without doing anything.

Interwoven Fiber + Weed-Blocking Backing for Double-Layer Sunlight Suppression
The two layers of this rubber mulch mat roll are interwoven rubber fibers on top and a thick backing that keeps weeds out on the bottom. These two layers work together to form a barrier that blocks sunlight from reaching the soil. This process stops weed seeds from germinating and stops new seeds from taking root. Single-layer cloth weed barriers do not work as well with this method because they wear out or let light through over time.

Without constant maintenance, the double-barrier design keeps flower borders, garden beds, and path edges looking clean. Gardeners can expect to pull weeds much less often after installation.

Porous Rubber Fiber Structure for Superior Drainage and Breathability
This rubber mulch mat roll features open fibers that allow water, air, and moisture to reach the soil below. This feature ensures the plants' roots continue to receive enough water and air, even when the mat covers the surface. This rubber design is better for plants than ground covers that do not allow water to pass through, which can lead to root rot or soil compaction.

When a mat lets air flow through it, it does not keep heat against the dirt surface, which can hurt grass with shallow roots in the summer. The ability to drain water well is especially helpful in wet climates or low-lying garden areas where puddles and mud build up easily.

Cuttable Rubber Mulch Mat Roll with Custom-Fit Design for Flexible Coverage in Any Garden Space
You can easily cut each roll to fit curved edges, odd shapes, or tight places around plants and buildings with regular gardening shears. Each roll is 120 inches long and 4.5 inches wide. You do not need any special tools or a professional to lay the mat; just measure the area, cut the mat to the right length, and lay it flat. This feature makes it useful for many applications, from raised bed paths to garden edging.

Cutting the mat to size also reduces waste, since gardeners can use each roll effectively in multiple places. The mulch mat roll can be used to define a flower bed, line an orchard walkway, or edge a veggie garden. It can be arranged however you want, without changing how it works or looks.

40 U-Shaped Metal Stakes Included for Secure, Wind-Resistant Installation
There are 40 U-shaped metal ground stakes in this 4-pack of mulch mat rolls, so you have everything you need to set them up right away. The stakes hold the mat firmly in place in the ground so it does not move when it rains, when the wind blows, or when people walk on it. There is no need for glue, digging, or extra gear.

The number of stakes that come with the set is enough to fix all four rolls in several different garden layouts. If you attach the mat correctly, it will stay in place and continue to work as a weed barrier, mud stopper, and edger over time. Given the stakes, the mulch mat roll is a complete installation set ready to use as soon as it arrives.

All-Season Weatherproof Rubber Mulch Mat Roll for Year-Round Landscape Protection
With its special design, the VEVOR mulch mat roll can withstand sun, rain, frost, and snow without breaking, cracking, or losing its shape. The anti-aging rubber material does not break down when exposed to UV light or heat, so the mat will look and work the same whether it is in a hot garden in the summer or a yard that gets frost in the winter. Because it works all year, there is no need to take it down and put it back up at different times of the year.

Wood chips, straw, and other traditional mulches break down quickly and need to be replaced every year. This rubber mat, on the other hand, offers long-lasting use and does not need to be repaired in winter or summer. This weatherproof mulch mat roll is a useful, one-time purchase that will pay off for homeowners and landscapers looking to lower ongoing garden costs.
