

7-Day Astronomic Time Switch 4 Circuits, Rainproof 3R Enclosure

- 7-Day astronomic timing
- Automatic input voltage selection from 120 to 277 VAC, 50/60 Hz
- 64 events can be set for any combination of circuits and days
- 8 astronomic events eliminate the need for separate photo control devices
- 100+ hour supercapacitor maintains date and time in case of power outage
- Non-volatile memory protects programming indefinitely in case of power outage
- Easy-to-follow on-screen menus for programming to-the-minute accuracy
- Temporary override or permanent manual override available via push buttons
- Rainproof 3R Enclosure

| Circuit Contact | Load Type | Voltage | Frequency |
|-----------------|-----------|-------------|-----------|
| 30 Amp | Resistive | 120/240 VAC | 60 Hz |
| 20 Amp | Resistive | 28 VDC | DC |
| 30 Amp | Inductive | 120/240 VAC | 60 Hz |
| 20 Amp | Ballast | 120-277 VAC | 60 Hz |
| 5 Amp | Tungsten | 120/240 VAC | 60 Hz |
| 1HP | Motor | 120 VAC | 60 Hz |
| 2HP | Motor | 240 VAC | 60 Hz |
