# Why Buy a Rug Pad?

- Protect Your Floor
- Easy Sizing
- Make vacuuming easier
- Reduce wear and tear on the rug
- Soften your rug with another layer of cushion between your feet and hard floors

## Sizing and Buying Tips

A rug pad should be one inch smaller than your area rug on all four sides. This will allow the edges of the rug to taper to the floor, preventing a trip hazard and curling along the edges of the rug. Mohawk Home rug pads can easily be trimmed to size using household scissors.

For a rug placed on a hard flooring surface such as hardwood, tile or laminate, choose a rug pad that has non-slip coating on at least one side. This side should be placed down on the hard flooring to ensure that the rug stays in place.

For rugs placed over carpet, choose a pad with thick polyester fabric coated adhesive. This type of pad prevents a darker color rug from bleeding through on to lighter colored carpets.

# Dual Surface Rug Pad

## Product Overview

- 100% Post Industrial Recycled Synthetic Fibers
- 27oz
- Non Washable Latex Backing
- 1/4 inch pile

## Features and Benefits

- Best selling rug pad
- Dual sided for hard surface (rubber side down) or for use on soft surface (felt side down)
- Ideal for use on any hard surface flooring and carpeting
- Protects against abrasion and wear on all flooring types
- Provides extra cushioning underfoot
- Reduces pile crushing from furniture
- Pad can easily be trimmed to fit any size rug
- Made in the USA

# Pet Proof Rug Pad

## Product Information

- 90% Post Industrial Recycled Synthetic Fibers
- Pet Proof, Moisture Barrier Backing

## Features and Benefits

- Pet and spill proof barrier keeps liquids from reaching floor immediately, giving you time to clean up
- Provides extra cushion underfoot
- Non-slip grip that keeps area and accent rugs in place
- Pad can be easily trimmed to desired size
- Made from recycled fibers
