

# RUBBER Self-Stick Weatherseal

For best results, ensure surfaces are completely dry and free of dust, grime or grease. Install while temperatures are roughly between 40° & 90° F (5-32° C).

**Installation:** Unwind approximately 1/2" to start. Press adhesive side of tape firmly onto window or door frame. Leave backing paper on tape to prevent any stretching. Apply around door or window as needed and trim excess with scissors or razor. Remove backing paper.

**Windows:** Apply on upper and lower window sashes between window and window sill.

**Doors:** Apply to door stop molding across the top and down latch side.

## ESPUMA DE GOMA Burlete autoadhesivo

Para mejor resultado, asegúrese que las superficies estén secas y libre de polvo o grasa. Instále cuando las temperaturas estén alrededor de 40° & 90° F (5-32° C).

**Instalación:** Desenrolle aprox. 1/2" para comenzar. Presione el lado adhesivo del burlete firmemente contra el marco de la ventana o puerta. Deje el papel de reverso en el burlete para evitar que se estire. Aplique alrededor de la ventana según sea necesario y corte el exceso con tijeras o un cuchillo. Retire el papel de reverso.

**Ventanas:** Aplique al marco superior e inferior entre la ventana y la repisa.

**Puertas:** Aplique al molde del marco a lo largo del tope y del lado del herraje.

*\*When you properly seal and insulate your home, Frost King products are a part of a complete line of energy-sealing solutions for your home. Savings based on Energy Star's estimates of energy usage on an average home.
