

Instructions / Assembly

Thank you for choosing our Bulb Planter Tool. Please follow the instructions below for proper assembly and safe operation of your tool.

- 1 Unpack the bulb planter tool and ensure all packaging is removed.
- 2 Check that the long handle, T-grip, pedals, and serrated base are securely attached with bolts in place.
- 3 Hold the T-handle and place the serrated base over the spot where you want to dig.
- 4 Step down firmly on the middle pedal to insert the serrated base into the soil to the desired depth (up to 3.5 inches diameter holes).
- 5 Twist the handle slightly and pull upward to remove a soil plug.
- 6 Use the right pedal to release the soil plug effortlessly.
- 7 Place your bulb, sod, or plant into the hole and gently cover with soil.
- 8 Repeat the process as needed for planting, soil sampling, or transplanting.
- 9 After use, clean soil from the serrated base and store in a dry place to prevent rust and extend lifespan.

Warranty Information: This Bulb Planter Tool is backed by a 30-day limited warranty. During this period, if defects in material or workmanship occur under normal use, we will provide replacement parts or a full replacement. Please retain proof of purchase for warranty claims.
