

FAKRO LXS ladder ends are designed to protect the floor. These ends are essential for preventing damage to your flooring by providing a stable, protective barrier.

A key feature of LXS ladder ends is their ability to compensate for any excess trimming of the ladder. If a ladder has been cut too short, LXS ladder ends can help extend the ladder back to a usable length, ensuring it fits securely and performs effectively within the space requirements of your home.(Allows extension of excessively trimmed ladders by up to 3 3/8 inches(LXS-W) & 3 inches(LXS-M))

Moreover, LXS ladder ends allow for the extension of certain attic ladders, increasing the maximum installation range.

LXS-W for Wooden Folding Attic Ladders

Compatible with the following ladders: LWB, LWP, LWT, LWF-R, LWF-R Insulated, LTK, and LWF

LWB 10'4" ...x54
