Carefully remove the wind guard from the packaging and inspect for any damage such as chips or cracks. Place glass panels on a soft, flat surface to prevent any damage. Before assembly, ensure that each bracket has 2 set screws, with silicon inserts attached at the tip. Estimated Assembly Time: 30 Minutes | DO NOT over tighten hardware!

- 1** You will assemble the wind guard upside-down.

Loosen the set-screws in one **Top Bracket** **D**, then slide a short and long panel of glass into the bracket as shown.

Align bracket with lower edges of each glass panel. Ensure small silicone pad is in place at tip of each set-screw - **do NOT tighten metal screw directly to the glass. Over-tightening may break glass!** Tighten set-screws until snug.

Hardware Used: **D** Top Bracket x1

- 2** Repeat step 1 for remaining three corners.

Hardware Used: **D** Top Bracket x3

3 Loosen set-screws and carefully slide **Bottom Bracket** % onto glass with rubber foot pointed up. Position edge of glass panel flush with bracket edge. Check that silicone guards are in place, then secure all set-screws, making sure to not over-tighten. Secure remaining three bottom brackets using the same procedure.

Hardware Used: % **Bottom Bracket** x4

4 Carefully, using two people, turn the assembled wind guard upright. Gently set the glass guard onto fire pit, positioning the feet flat and level at the corners of the burner.

Be aware that the glass and hardware may become warm or hot after prolonged burning of the fire pit and take reasonable precautions to avoid burns.

CARE: When wind guard is completely cool, it may be cleaned with a soft cloth or paper towel and standard glass cleaner. Never spray cleaner or water on a hot wind guard, as it could crack or shatter.
