

Thank You

for bringing me home!

Spruce Me Up

I've been in a dark box traveling. Here are some quick tips to get me settled:

- Remove yellow leaves or broken stems.
- If my soil is dry, give me a drink of water.
- Set me in the right light.

PLANT CARE

Cacti & Succulents

Light

I like bright, indirect light where I cast a strong shadow at least a couple of hours a day.

Water

I don't want my roots to stay wet, so let the potting soil dry before you water me again.

Food

I don't need a lot of fertilizer, so you can feed me once or twice in spring and/or summer. You can feed me more often if you want me to grow faster.

Features

Cacti and succulents come in a diverse range of colors, textures, and sizes -- all with low water needs!

Growing tips

Take care not to overwater us; we need to be more dry than wet. Cacti & succulents are perfect for DIY projects!

Give me friends! I play well with:

Aloe Vera, Echeveria, Jade Plant

This plant may have some natural degree of toxicity and may cause discomfort or illness if ingested. Additionally, exposure to the sap of this plant may cause discomfort to individuals with a sensitivity to it upon contact. Grown for ornamental purposes and not intended for human or animal consumption.
