

Important Care Instructions!

Thank you for your Mailbox purchase. During unpacking and installation handling you may discover some fingerprint markings on the surface of the mailbox and post. These are easily removed with the use of any multi-surface household cleaner such as Formula 409, Windex, or Simple Green.

Do not use any multi-surface product containing bleach.

Do not use any product containing abrasives such as cleanser powder or solvents such as isopropyl alcohol.

It is important to remove any salt or other chemicals that may get deposited onto the surface of the mailbox. Ongoing cleaning may be achieved using non-abrasive soap and water. To help protect your mailbox after cleaning you may apply a coat of carnauba wax to the surface.
