

## BOND

Connect the Things You Couldn't!

Creating a smart home shouldn't break the bank. Now you can connect your older remote-controlled appliances without replacing them!

## Remotes Meet the Smart Home

The Bond is a single device that connects traditional, remote-controlled appliances like ceiling fans to your Wi-Fi network. Now you can activate them with just your voice using a smart speaker, or from anywhere in the world using a phone or tablet.

## Installation is easy.

Nothing to wire or to connect. Use the app to record your ceiling fan remote control and you are good to go.

# What the BOND Can Do For

## **Make your remote-controlled appliances smarter**

The Bond can read, record, and duplicate the signals sent from your remote controls. Now you can connect your ceiling fans to your Smart Home.

## **Take control**

The Bond can replicate any command that your remote control can dish out. Fan speeds, lights, dimmers - anything goes!

## **Convenience from anywhere**

The Bond lets you activate your remote-controlled appliances even if you're not there. Turn on your devices and arrive to find a cool, comfortable home.

## **Voice activation is a breeze**

Works with your favorite Smart Speaker to enable voice control.

# Better Together

Integration with Amazon Alexa and Google Home.

**BOND**

**amazon alexa**

## Key Features

Control your appliance from your phone from everywhere

Scheduling

Works with Amazon Echo and Google Home
