Light Bulbs

Standard A-Type

The Biggest Thing Since the Light Bulb.™

Finding an affordable LED bulb that looks and lights like an incandescent can be a challenge. There's weird shapes, bulky sizes and most carry a hefty price tag.

Cree® LED bulbs are different. Only Cree LED bulbs look and light like an incandescent, while using up to 85% less energy and lasting 25 times longer.

Made with a glass bulb like an incandescent, so it has that incandescent filament look. The light from Cree LED bulbs comes on instantly and is omnidirectional, fully distributing light above, below and all-around the bulb.

Cree LED bulbs: easy on the eyes and your wallet.

What makes them great?

- A-type bulb style with a standard screw in base. (E26 base).
- Save money now and save money later. Uses up to 85% less energy than an incandescent.
- Built to light and last. Covered by Cree's industry-leading 10-year limited warranty.
- Cree LED Filament Tower™ Technology. The genius idea inside that powers our omni-directional, all-around light.
- 25,000-hour lifetime compared to about 1,000 hours for typical incandescent.
- Perfect for indoor and outdoor lighting. (Damp Rated)
- Dimmable with most standard dimmers.
- Instant-on light.
- Mercury free.

Available in **soft white** and **daylight** color temperatures, Cree LED bulbs can be purchased online or in-store at The Home Depot®.

Great bulb. Great price.

Cree LED light bulbs work about everywhere you'd use a standard A-type bulb. Just screw them in, turn them on and start saving money. Cree LED bulbs are built to last, and they're covered by our industry-leading 10-year warranty, so you can be sure the savings will last too.
