- Leaves surfaces clean— no need to rinse.

SAVOGRAN

Dirtex Powder cleaner

Description

Our best selling general purpose household cleaner for use on every washable surface in the home. This quick-dissolving powder delivers greater cleaning power, yet is very gentle to the skin. When used with warm water and sponge or soft towel, Dirtex leaves surface clean without rinsing for repainting or rewaxing.

Application

Recommended for cleaning walls, floors and woodwork and for preparing surfaces for repainting. Dirtex is widely used by painters and professional cleaners.

Directions

Painted and varnished surfaces: Mix two tablespoons per gallon of warm water. Start washing from the bottom of walls upward to avoid streaking. Squeeze sponge or cloth to a damp condition to avoid splashing and run-off. Do not allow spots or puddles to stand on floors. **Ceilings:** Using same strength cleaner as above, wash ceiling surfaces in small areas. Clean each area well, then move on to the next. **Floors:** for asphalt, rubber, vinyl or linoleum use the same strength solution as above. Wring excess cleaner from mop or sponge, then clean dirt from surface, mopping floor in areas approximately 5 feet square. If this strength solution does not clean well in first area, add a small quantity of Dirtex to solution and clean area again. **Kitchens and bathrooms:** Mix a solution as mild as possible to accomplish the job. Start with two teaspoonfuls per gallon of warm water. If this solution does not clean surface, add more Dirtex (heavy deposits require a heavy duty cleaner such as TSP. Some cleaning may require an abrasive or solvent type formula instead of a detergent cleaner to achieve results).

Important label information

CAUTION: HARMFUL IF SWALLOWED. EYE IRRITANT. (see other cautions on back panel). Before use, always read all information and warnings on container. Material Safety Data Sheets are available upon request.

**KEEP OUT OF REACH OF CHILDREN
NOT RECOMMENDED FOR USE ON GLASS SURFACES**
