

INSTRUCTION GUIDE

REPAIR P-TRAP

1

Place nuts **(A)** and washers **(B)** onto tailpiece. If using slip joint elbow, place nuts **(A)** and washers **(B)** onto wall tube as well. Use reducer washer **(E)** if tailpiece is 1-1/4 in.

2

For slip joint elbow, attach elbow **(C)** to J-bend **(D)** and wall tube. For solvent weld elbow, follow instructions on PVC solvent cement to connect elbow **(C)** to wall tube. Once solvent weld process is complete, attach J-bend **(D)** to tailpiece and elbow **(C)**.

3

Tighten nuts. **CHECK FOR LEAKS.**
