

GENERAL **IMPORTANT INFORMATION** Check the inside of the larger pieces in your box for other materials packed inside. • When assembling components, place on a non-abrasive surface (i.e. shipping box) to avoid scratching. • We recommend an area approximately 5'x 8' for unobstructed assembling. • You should not need to use excessive force when assembling components. **MISSING** OR VISIT OUR WEBSITE FIRST, **DAMAGED** PARTS? SO WE CAN HELP YOU RIGHT AWAY! Although great care has been taken to ensure proper packaging and handling of this product, occasionally problems occur. If you discover any missing, damaged or defective parts, please visit our website to order replacement parts. If you experience any further trouble with your product, please contact our customer service department. parts.nychbrands.com ☑ hmmm@wambamfence.com 704-892-5222 / 877-778-5733 Customer service agents are available to take calls weekdays from 9am-**5pm EST**. If you call outside of business hours, please leave a voicemail. To help you quickly and accurately, please have reference item number **BL19103** and the specific part name which can be found on page 6. It is helpful if you can provide the batch lot number listed on the inside of the box. NFFD ASSEMBLY If you are having problems with the assembly or installation of this product, we are happy to assist you with the process, so HELP? please give us a call at 704-892-5222 / 877-778-5733. If for some reason you need to return this product, please NEED TO allow us to help resolve your issues first. If you still decide to **RETURN?** return the product, you will need to initiate the return from the company you originally purchased from.

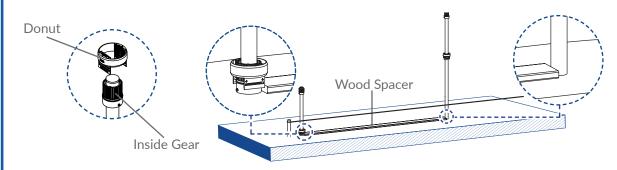

TIPS

1. Run a string line to help establish the post location(s).

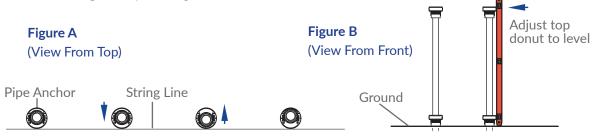

2. To space the pipe anchors more easily, use a piece of wood measuring 70%" in length from the inside gear to the next pipe anchor.

3. After you have installed the first two vinyl posts and have checked your spacing, temporarily remove the posts to create an unobstructed string line.

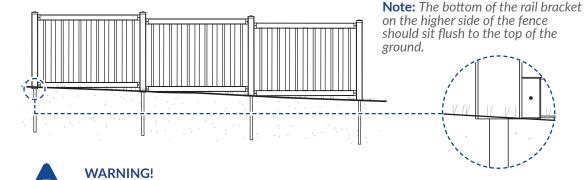

4. When cutting PVC, use a saw with a fine-toothed blade.

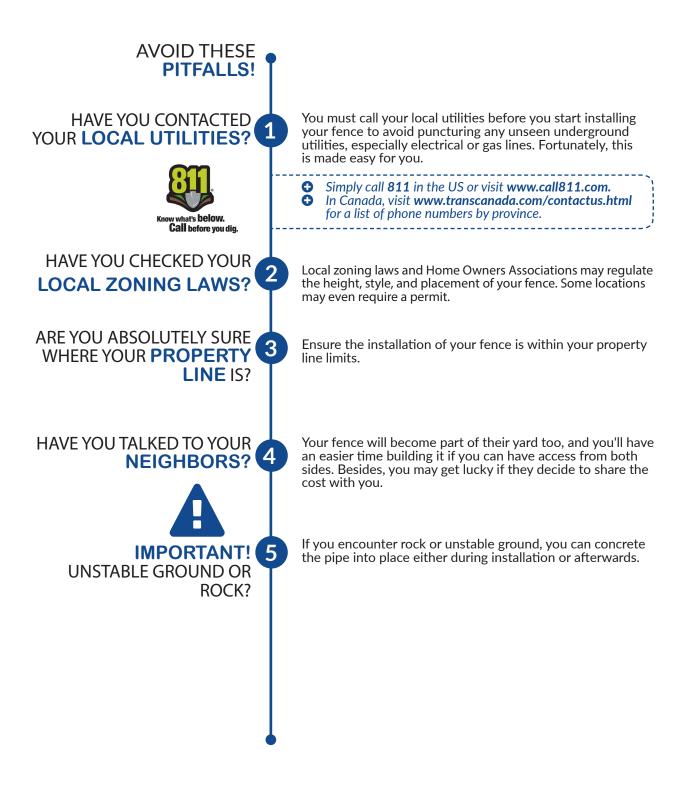

5. Once the pipe anchors are set, you can use your string line to adjust your lower donuts to make a straight fence line (*Figure A*). Then use a level to adjust the top donuts to ensure each post is level to the connecting fence panel (*Figure B*).

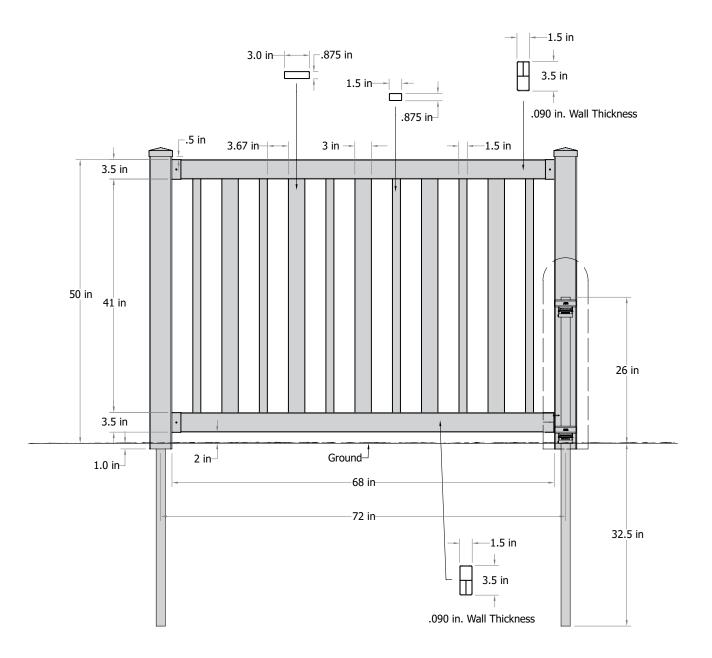

6. Most yards are relatively level and will allow for a fairly simple installation. If your yard is steeply pitched or is very uneven, you may need to stair step your panels as illustrated below. Post heights can be trimmed down as necessary.

If your yard has a severe slope or an elevation change greater than approximately 3" to 4" over one panel of fence, you will not be able to install this fence. Your post will not be long enough to accommodate this slope.

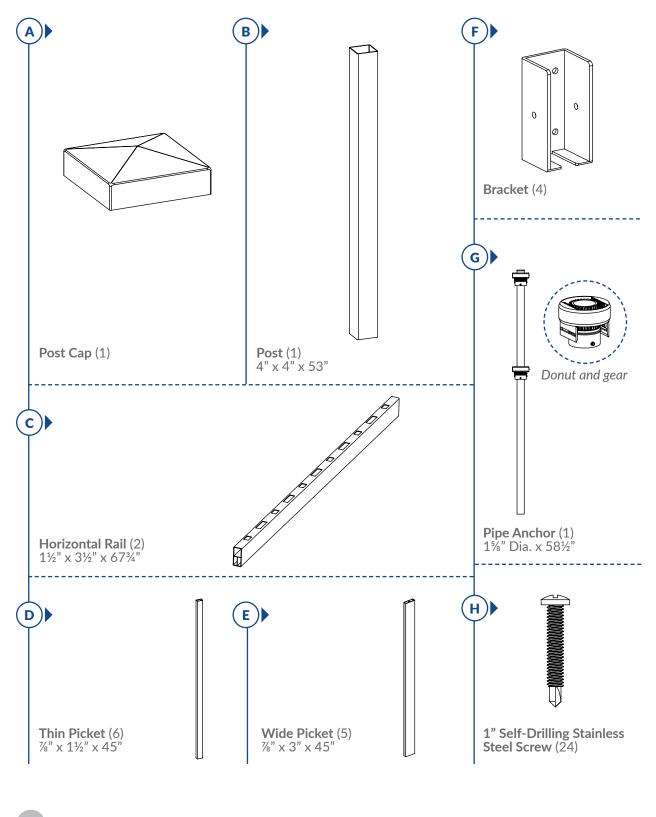

DETAILED PRODUCT DIMENSIONS AND SPECIFICATIONS

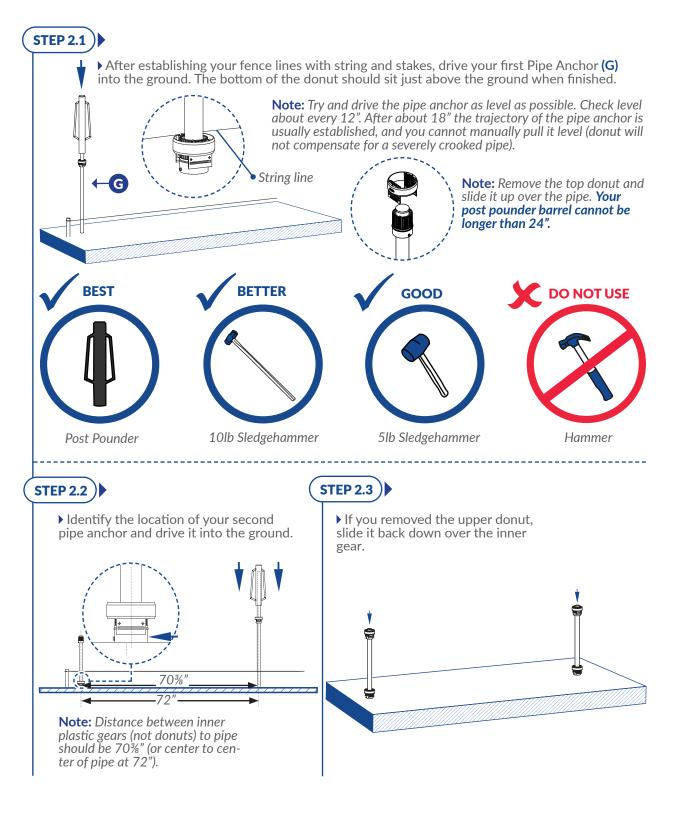

•

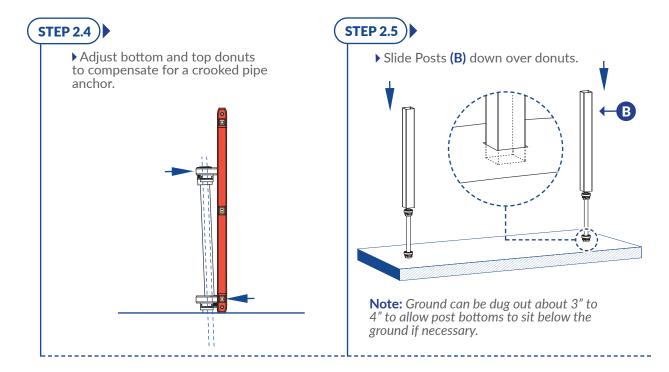

5

STEP 1: LAY OUT MATERIALS

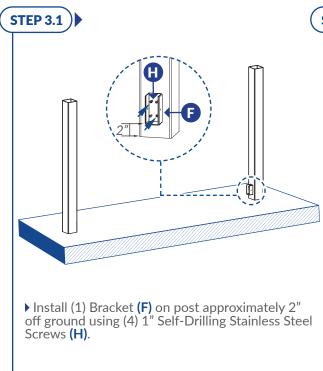

STEP 2: INSTALL PIPE ANCHORS AND POSTS

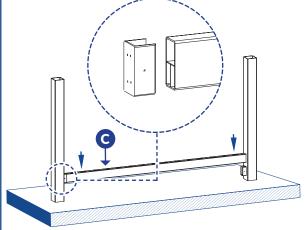

STEP 3: INSTALL BRACKETS AND BOTTOM RAILS

STEP 3.2

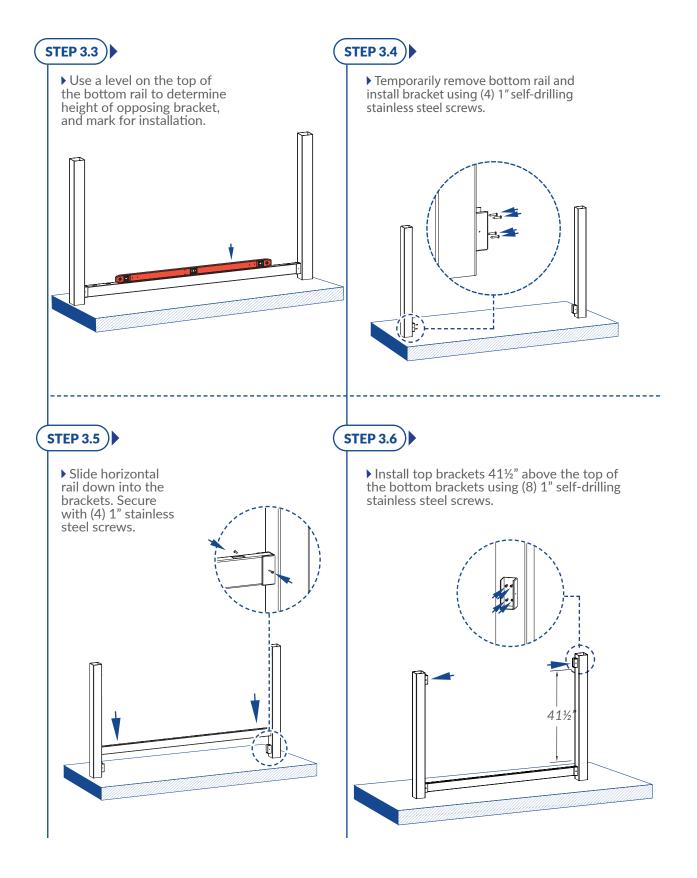

▶ Place second bracket over the opposite end of the Horizontal Rail (C), and slide the rail down into the bracket on the opposing side.

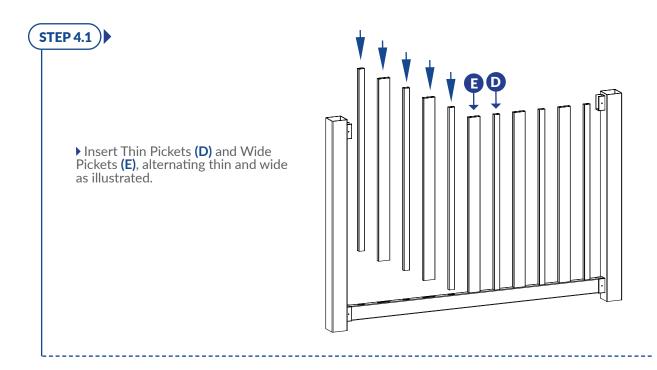

Note: There could be a slight conflict between the head of the exposed screw and the end of the rail in a tight fitting application. The end of the rail can be notched to accommodate.
