KOHLER® Toilets Service Parts

Tips to Finding the Right Part

Check if Your Toilet Is a One-Piece or Two-Piece Toilet

One-piece toilets integrate tank and bowl into a seamless design.

Two-piece toilets feature the traditional design of a separate tank and bowl.

Determine Your Toilet's Flushing Technology

All KOHLER flushing technologies are described, along with their common replacement parts, on pages 4-11. To determine your toilet's flushing technology, look inside the tank and compare your flushing technology with those pictured in this catalog.

Look for Model and Service Information

If you have a toilet manufactured:

After 1990, service information is imprinted on the underside of tank lid.

The toilet number is imprinted on the inside back of the tank.

Find Your Toilet in the Matrix

If you do not find the part you need pictured on pages 4-11, use the information you have gathered to find your toilet in the corresponding section of the matrix. The replacement part numbers for the float/fill valve, flush valve, tank gasket and flush ball/flapper are listed for each toilet. To view all the service parts for your toilet, visit KOHLER.com/serviceparts for the expanded service parts pages.

Canister (Single-Flush) Toilets

CLASS SIX® KOHLER®

CLASS FIVE® KOHLER®

If you have a single-flush canister toilet, you will not see a flapper in the tank but a cylinder-shaped flush valve. These toilets do not use a flapper, but a seal. ***If your toilet is leaking water into the bowl, the seal needs to be replaced, not the canister.***

AquaPiston®
*AquaPiston canister allows water to flow into the bowl from all sides (360 degrees), increasing the power and effectiveness of the flush.
