

# HOME DECORATORS COLLECTION

With regular care and maintenance, the products will provide years of superior performance and satisfaction.

To maintain the quality of the product, please follow the cleaning procedures provided below.

## **The Value of Caring**

The materials of the aluminum chair and stool are built for strength and durability. The construction results in long-lasting and easy-to-clean products.

Please note that suntan lotions and sprays, as well as insect repellents, may discolor the furniture material or finish.

Acid-based liquids, such as coffee, wine, and fruit juice, need to be wiped up immediately using a clean, soft cloth.

The longer a spill remains, the more difficult it will be to remove and may stain.

## **We recommend normal cleaning at least once a year.**

### **Normal Cleaning**

Use a solution of 1 tablespoon detergent powder (unscented) that has been diluted in 1 cup of warm water.

After cleaning, rinse the metal with clean, warm water, and wipe dry with a clean, soft cloth.

Do not use abrasive, acid, alcohol-based, or solvent-based cleaners; they could damage the paint finish.

Do not use a power washer to clean aluminum furniture; it could damage the paint finish.
