## HERE'S HOW TO TAKE CARE OF ME

## Peperomia

### LIGHT

This plant needs to live in a room with at least some natural light. Place it on a table or countertop with windows nearby.

### WATER

This plant can only go 1-2 weeks without water so check on it weekly and add water every time the top two inches of soil dry out.

### FOOD

Feed me once or twice a year during Spring and Summer with a fertilizer formulated for houseplants.

### FEATURES

I have lovely variegated leaves that are easy to care for.

### GROWING TIPS

Avoid overwatering. Peperomia is susceptible to root rot if it stays too wet. Wipe the leaves down once or twice a month to prevent dust build up.

### GIVE ME FRIENDS

(I play well with)

Sterling Silver, Alocasia, Pilea
