

## Remnant Info Guide

- **Definition of a Remnant**

A remnant describes a product sold at a value. Carpet remnants are pieces of carpet of varying sizes, colors, yarns, and weight. When purchasing a remnant, there are no two pieces exactly alike. Each individual piece is unique.

- **Remnant Finishing**

All of our remnants have finished ends. The process is called “serging” which is a whip stitch finishing. We do our best to coordinate the finishing edge with the actual color of the carpet.
