

Assembly & Care Manual

Hanging Egg Chair

1. Safety Warnings

Maximum Load: Do not exceed 120 kg / 265 lbs. Exceeding the limit may cause structural failure.

Installation Surface: Ensure the base is placed on a flat, solid, and level surface (e.g., patio, balcony floor) to prevent tipping.

Stability Check: Before each use, ensure all connections (hooks, chains, frame joints) are secure and the chair hangs evenly without contact with the frame.

Usage: This is a suspended relaxation chair. Do not stand, kneel, or allow children to climb or swing vigorously on it. Adult supervision is required.

2. Pre-Assembly Checklist

Unpack all parts and lay them on a soft surface to avoid scratches.

Check all parts against the Parts List. Report any damage or missing parts to the retailer immediately.

Recommended Tools: You may need a rubber mallet (for tapping joints) and a soft cloth.

3. Assembly Instructions

Step 1: Assemble the Base Frame

Connect the curved hanging arms to the central hub of the base frame using the provided bolts.

Attach the four legs to the central hub to form the stable "X" base. Ensure all locking knobs or bolts are hand-tightened securely.

Step 2: Attach the Hanging Chains

Locate the two main hanging chains with safety hooks.

Attach the top hooks to the designated loops or holes at the ends of the curved hanging arms.

Ensure the chains are not twisted and are of equal length for a balanced hang.

Step 3: Install the Chair Basket

Carefully tilt the woven PE rattan chair basket onto its side.

Connect the bottom hooks of the hanging chains to the four reinforced connection points on the top rim of the chair basket (two on each side).

Important: Double-check that all safety hooks are fully closed and latched.

Step 4: Final Adjustment & Placement

Gently lift the chair basket to an upright position, allowing it to hang freely.

Adjust the chain links if necessary to achieve your preferred sitting height and recline angle.

Place the thick seat cushion and back cushion inside the basket.

4. Usage & Adjustment

Height/Recline: You can adjust the hanging height and tilt by changing the chain hook to different links. Ensure both sides are adjusted equally.

Folding for Storage: To fold, simply remove the cushions, lift the chair basket off the hooks, and fold the base frame according to its joints.

5. Cleaning & Maintenance

PE Rattan & Frame: Wipe clean with a soft, damp cloth and mild soapy water. Do not use abrasive cleaners. Air dry thoroughly.

Cushion Covers: The grey cushion covers are removable and machine washable. Use a gentle cycle with cold water. Air dry only; do not tumble dry.

Metal Parts: Periodically check for tightness. Wipe with a dry cloth. If used outdoors in harsh climates, occasional application of a rust inhibitor is recommended.

Regular Inspection: Periodically inspect all hooks, chains, links, and frame connections for signs of wear, deformation, or corrosion.

6. Storage

For long-term storage or during extreme weather, it is recommended to:

Store the cushions indoors in a dry place.

Disassemble the chair by reversing the assembly steps.

Fold the frame and store all components in a cool, dry location.
