SAFETY INTRODUCTION

Read this manual carefully before starting or using the device. Always store the manual in the immediate vicinity of the device or its site of use!

INSTALLATION has to be made by a qualified/registered electrician. DO NOT attempt to install by yourself as WE will not be responsible if this product is not installed by a professional.

Warning

- All fittings must be installed in accordance with current IEE wiring regulations. If in doubt, consult a qualified electrician.
- Switch off the electrical supply at the main circuit board BEFORE installation and maintenance.
- Inspect the product immediately upon receipt for transit damage or missing parts.
- Handle the product with care and protect against knocks to all sides and edges of the glass.
- Make sure that you have all the tools you need to complete the job
- Ensure there are no hidden pipes or cables in the wall before drilling.
- If drilling holes in ceramic tiles use a piece of masking tape on the tile to stop the drill bit from slipping.
- Wear suitable eye protection when drilling. Take care when using power tools near water - the use of a residual current device (RCD) is advised. Beware of hidden cables or pipes. Take care if drilling on tiled surfaces in case the drill slips. A piece of masking tape applied to the wall before marking out the fixing holes will stop the drill from wandering.
- DO NOT strike glass components with hard or pointed items.
- DO NOT place very hot or very cold items against or in close proximity to glass surfaces unless an adequately thick insulation material is used to prevent such items from coming in contact with the glass.
- The nominal thickness of the mirror glass used in this product is 5mm. If the glass becomes chipped or broken replace immediately;
- This product should be positioned well away from curtains and other fabrics. Never cover the mirror when this product is heated, we recommend that it is turned off after use and should never be left on for prolonged periods of time
- This product could be dangerous if installed incorrectly.

Aftercare Tips

- Clean using a soft dry cloth only when turned off.
- Never use cleaning agents or abrasive materials.
- Do not allow moisture to come into contact with light strips.

Claim Policy

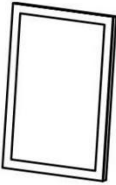

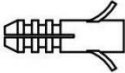

Thank You For Choosing To Buy A Product.

Customers can contact us for refund or replacement of your appliance if it is found to be defective due to faulty materials, workmanship or function within 1 year of purchase or delivery.

Does not guarantee the refund or replacement of a product where a defect is the result of:

- Damage caused by not carrying out the recommended appliance maintenance.
- Accidental damage, faults caused by negligent use or care, misuse, neglect, careless operation or handling of the appliance which is not in accordance with our Operating Manual.
- Use of the appliance for anything other than normal domestic household purposes.
- Faulty installation.
- Repairs or alterations carried out by parties other than OUR company or its authorized agents. If you are in any doubt as to what is covered by your guarantee, please contact us.

INSTALLATION INSTRUCTION

⚠ INSTALLATION has to be made by a qualified/registered electrician. DO NOT attempt to install by yourself as WE will not be responsible if this product is not installed by a professional.

Before starting your installation, please make sure

- The wall surface must be of suitable strength and construction
- The main electricity supply has been power off

- (1) Choose the mounting position, keep the required distances;
- (2) Mark the positions for the boreholes according to the mounting panel.
- (3) Drill the holes.
- (4) Insert the dowels into the holes one by one.
- (5) Fasten the mounting panel on the wall. Insert the screws into the dowels and fasten the screws.
- (6) Hang the mirror on the mounting panel.

Note: please tear off the front protective film once you start to use.

HARDWIRE INSTRUCTION

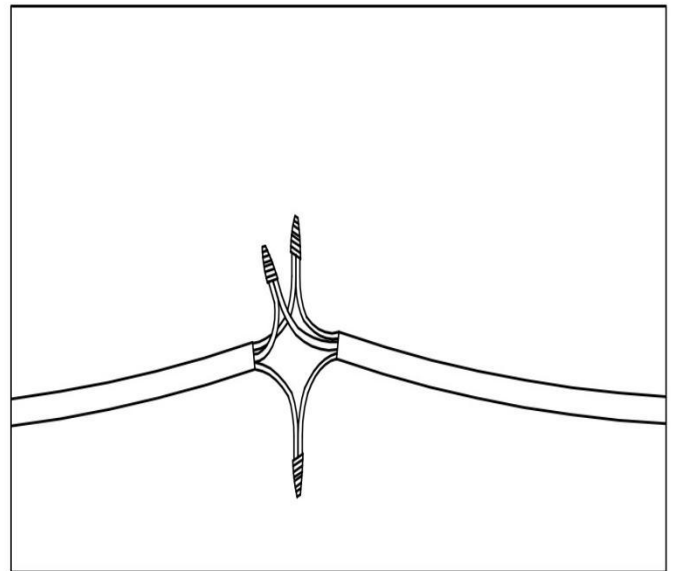

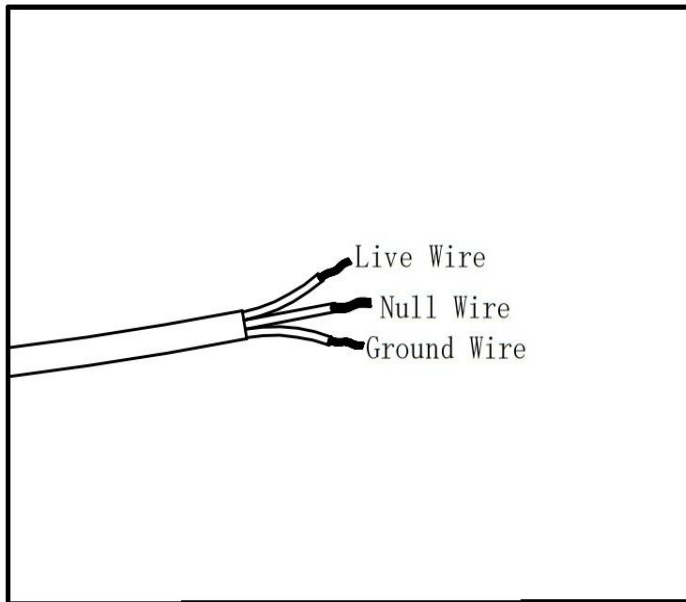

⚠️ INSTALLATION has to be made by a qualified/registered electrician. DO NOT attempt to install by yourself as WE will not be responsible if this product is not installed by a professional.

Before starting your installation, please make sure

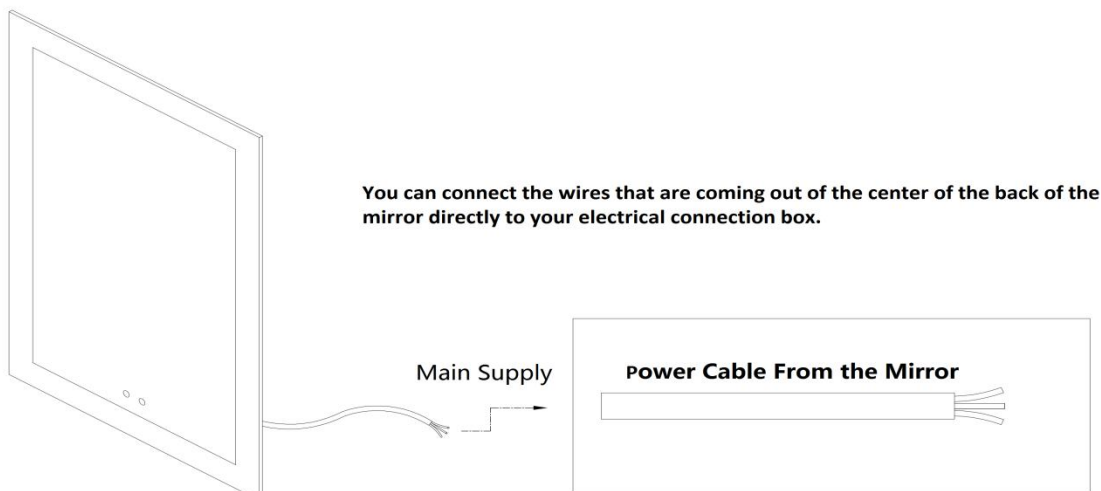

- The wall surface must be of suitable strength and construction
- The main electricity supply has been power off

Each mirror is equipped with a plug. If you want to use a wall switch to control the mirror light, please cut the plug. Therefore, You could connect the wires that are coming out of the center of the back of the mirror directly to your electrical connection box. The lead contains 3 wires:

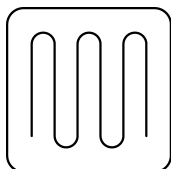

- Copper Wire (Green) = GROUND wire. connect to the ground wire in your box, or to the box as a ground.
- White = NEUTRAL wire. connect to the White neutral wire in your box.
- Black = HOT wire. connect to the Black hot wire in your box.

- (1) Cut the plug. You would see there three wires with three colors--white, green and black.
- (2) Safely connect these three wires one by one to the wires of wall switch in your home.
