Starlight Projector

aura LED

User Guide

**USB** POWERED/RECHARGEABLE

INTRODUCTION & FEATURES

The ColorGalaxy Starlight Projector adds the perfect, magical spark to any bedroom – but also to birthdays, dance parties, room decor, holidays, and more! This captivating light creates a wonderful, starry atmosphere that stimulates children's curiosity, imagination, and creativity. The Starlight Projector can also help children overcome a fear of the dark and ease them to sleep naturally. On top of all that, the Starlight Projector is an awesome solution as the backdrop for a romantic evening…or just for use as a regular night light or bedside lamp.

Please be sure to fully charge the projector before the first use.

PRODUCT OVERVIEW & FUNCTIONS

Movement Button
Power Button
Brightness Button
Micro-USB Charging interface
Charging Indicator
Projection
Projector
Laser

This projector consists of a laser, a pattern light, and an ocean wave light. These lights can be projected to display scene(s) of twinkling stars, a static moon, and floating clouds. PLEASE NOTE: Since the Starlight Projector contains a laser/bright light, do not look directly into the lens.

Button	Function
1. The "Power" Button	**Press once:** moving blue sky, moon, and green/gradient starlight **Press two times:** moving tricolored/switching sky, moon, and green/gradient starlight. **Press three times:** static blue sky and moon, gradually fading starlight **Press four times:** moving blue sky **Press five times:** gradient/green starlight **Press six times:** unit switches off
2. The "Movement" Button	This button will cycle 4 modes - • Will freeze movement without moon • Movement with moon • Will freeze movement with moon • Movement no moon
3. The "Brightness" Button	**Press once:** the overall illumination is dimmed. **Press twice:** the overall illumination is at its dimmest **Press three times:** the overall illumination is restored to the brightest setting. The pattern will cycle with each successive button press after that.

Button	Function
4. Micro-USB Charging Interface	To charge the Starlight Projector, plug the Charging Adapter into any outlet then plug the larger end of the USB cable into the adapter and the smaller end into the projector. If no outlets are available, an open USB slot on your computer/laptop will charge the projector as well.
5. Power Indicator:	When the Starlight Projector is being charged, the power indicator will turn red. When the Starlight Projector is fully charged, the power indicator will turn green.

Each time the Starlight Projector's main switch is pressed, the built-in timer function is turned on, and the unit will automatically shut down in four hours.

SPECIFICATIONS

Input Power: 5V/1A
Battery: 3.7V 2000mAh
Charging time: Up to 7 hours
Operating time: 3-4 hours when fully charged.

SAFEGUARDS:

• To reduce the risk of fire, electrical shock, or other injury please take precautionary measures and read all of the instructions before use.

• The Starlight Projector is made for indoor use. Please do not use outdoors and avoid rain or water as this will damage the projector.

• Do not expose to fire or extreme heat conditions. This may cause the Starlight Projector's battery to generate excessive heat, ignite, or explode.

• If the device damaged, please contact our customer support immediately for maintenance. Do not assemble and/or disassemble the device by yourself. Tzumi will not be liable for any damage/injury caused by user disassembly.

• Do not shine the projected laser directly in or around the eyes.
