**Installation**

1. **Removing the canopy**
   - **NOTICE:** For fans not equipped with a control or connection, please contact a qualified electrician.
   - Before installation, use the pull chain to set the fan to high and the light to off. Open the power in off before proceeding.
   - Remove the canopy by following the instructions supplied by the fan manufacturer.
   - Remove the screws that connect the wires from the outlet box to the fan, leaving the grounding wires connected.

2. **Installing the receiver**
   - Choose the hanging system that most closely resembles the one used by your fan and install the receiver (A) as per manufacturer's instructions.
   - **NOTICE:** Some fans have compatible models for each receiver. For easier receiver installation, check your receiver, leaving a minimum of 6 in. remaining. The top of the fan head should be 12 in. or above the receiver, place the remaining receivers into the ceiling electrical box. The location and type must remain properly grounded.

3. **Wiring the receiver to the fan**
   - Using the orange wire connectors (D), connect the yellow wire from the receiver (A) to the black wires from the fan. Connect the blue wire from the receiver (A) to the white wire (or possibly black) with white stripes from the fan.

4. **Installing the battery**
   - Before operating the wall control (B), press the battery door to eject it. Using a Phillips head screwdriver, remove the battery holder. Install the battery (C) with the positive (+) facing up. Secure the battery holder. Finally, install the battery into the wall control (B). When necessary, replace the used battery (C), with a 5032/32 battery.

5. **Installing the wall control**
   - Before attaching the wall control (B), install the fan's receiver (A) to the fan, leaving the grounding wires connected. The fan will not operate.

6. **Pairing the wall control and receiver**
   - **NOTICE:** The wall control (B) must be paired before the fan will operate.
   - Pair the fan with the wall control by pressing the remote button for at least 30 seconds. During this time, the remote button will flash two times followed by the receiver (A). The wall control (B) is now paired to the fan's receiver (A).

**Safety Information**

**Warranty**

1-YEAR LIMITED WARRANTY

**What is Covered**

- The manufacturer makes the following limited warranty to the original purchaser of the wall control. The Fan's warranty is limited to items that are defective in material or workmanship upon delivery to the original purchaser from the date of sale. If the wall control malfunctions or fails within the warranty period, the manufacturer will, at its own discretion, repair or replace a defective wall control. This warranty is for the original owner of the wall control and is non-transferable.

**WHAT IS NOT COVERED**

- This warranty does not cover failures or failures which were caused by repair or modification performed by anyone other than the manufacturer or by anyone who is not authorized to perform such repair or modification.
- This warranty also applies to batteries in the wall control or fan unit.

**Care and Cleaning**

- To ensure safe operation, read and follow all safety information and instructions provided with the wall control. The wall control must remain properly grounded.

**Troubleshooting**

- **Problem:** The fan remote control is operating inconsistently.
  - **Solution:** Insert the wall control (B) into the outlet box, and secure the two screws using a Phillips head screwdriver. Figure C.

**Tools Required**

- Flat Blade Screwdriver
- Phillips Screwdriver
- CR 2032 battery
