

Shelving Use and Care Guide

These floating shelves are made from high-quality, durable solid oak wood.

Use and Care:

These shelves are not only visually appealing but also exceptionally durable.

Cleaning:

You should take the same precautions in cleaning a shelf you would for any type of wood.

Use a slightly damp cloth to spot clean (if needed). Wipe dry with a clean dry cloth.

Weight Limit:

Our wood floating shelves have a strong load-bearing capacity that can hold up to 45 pounds.
